WHAT FACTORS INFLUENCED PERFORMANCE

The Fund’s performance is largely based on the performance of the market for bonds issued by the U.S. Treasury. Periods of falling real interest rates will generally correspond to positive performance, and periods of rising real interest rates will generally correspond to negative performance.

PERFORMANCE COMMENTARY

In 2024, the Fund’s performance was negatively impacted by rising interest rates in the first and fourth quarters. However, because the Fund’s strategy is designed to “lock in” interest rates such that it can reliably sustain its planned distributions, the Adviser does not expect the Fund’s 2024 performance to impact its ability to sustain its planned distributions through its planned end year.

MATERIAL CHANGES

On September 13, 2024, the Fund was converted from a mutual fund to an ETF.

On February 10, 2025, the Fund changed its name to “LifeX 2053 Inflation-Protected Longevity Income ETF.”
