

STATEMENT OF ADDITIONAL INFORMATION

STONE RIDGE TRUST

STONE RIDGE U.S. HEDGED EQUITY FUND

Class I	VRLIX
Class M	VRLMX

March 1, 2021

510 Madison Avenue, 21st Floor
New York, NY 10022
(855) 609-3680

Stone Ridge Trust consists of three funds, including Stone Ridge U.S. Hedged Equity Fund (the “Fund”). Additional Stone Ridge Trust funds are offered in separate prospectuses and statements of additional information.

The Fund is an investment portfolio of Stone Ridge Trust, an open-end series management investment company organized as a Delaware statutory trust.

This Statement of Additional Information (“SAI”) is not a prospectus and is only authorized for distribution when preceded or accompanied by the Fund’s current prospectus dated March 1, 2021, as supplemented from time to time (the “Prospectus”). This SAI supplements and should be read in conjunction with the Prospectus. The audited financial statements and notes thereto in the Fund’s Annual Report to Shareholders for the fiscal period ended on October 31, 2020, as filed with the Securities and Exchange Commission (the “Commission”) on January 11, 2021 (Accession No. 0001193125-21-006407) (the “Annual Report”), are incorporated into this SAI by reference. The financial statements included in the Annual Report have been audited by Ernst & Young LLP, whose report thereon is also incorporated herein by reference. No other parts of the Annual Report are incorporated by reference herein. Copies of the Prospectus and/or Annual Report may be obtained without charge by writing the Fund at the address, or by calling the toll-free telephone number, listed above.

ADDITIONAL INVESTMENT INFORMATION, RISKS AND RESTRICTIONS

The Prospectus discusses the investment objective of the Stone Ridge U.S. Hedged Equity Fund (the “Fund”), as well as the principal investment strategies it employs to achieve its objective and the principal investment risks associated with those strategies.

There is no assurance that the Fund’s investment objective will be achieved. Additionally, because the Fund’s investment objective has been adopted as a non-fundamental investment policy, the Fund’s investment objective may be changed without a vote of shareholders.

Additional information about the strategies and other investment practices the Fund may employ and certain related risks of the Fund are described below. The Fund is a diversified investment portfolio of Stone Ridge Trust (the “Trust”), an open-end series management investment company organized as a Delaware statutory trust on September 28, 2012. Prior to October 28, 2019, the Fund’s name was the Stone Ridge U.S. Large Cap Variance Risk Premium Fund. On October 28, 2019, (i) the Stone Ridge U.S. Small Cap Variance Risk Premium Fund and the Stone Ridge International Developed Markets Variance Risk Premium Fund were reorganized with and into the Fund, (ii) each of the Stone Ridge U.S. Variance Risk Premium Master Fund and the Stone Ridge Global Equity Variance Risk Premium Master Fund were liquidated, with investors receiving a distribution consisting of shares of the Fund and cash in connection with such liquidations, and (iii) the Fund changed its name to Stone Ridge U.S. Hedged Equity Fund. Capitalized terms used in this SAI and not otherwise defined have the meanings given to them in the Prospectus.

Additional Investment Information and Risks

Additional Information Regarding Derivatives. In addition to the derivatives transactions described in the Prospectus, the Fund may also enter into derivatives contracts with respect to any security or other instrument in which it is permitted to invest or with respect to any related security, instrument or index (“reference instruments” or “reference securities”). The Fund may enter into a variety of derivative contracts, but typically expects to enter into put options and futures contracts. This universe of investments is subject to change under varying market conditions and as these instruments evolve over time. The Fund’s derivatives contracts may be centrally cleared or settled bilaterally directly with a counterparty. The Fund’s derivatives contracts may be cash settled or physically settled.

The derivatives contracts the Fund may enter into involve substantial risk. Derivatives typically allow the Fund to seek to increase or decrease the level of risk to which it is exposed more quickly and efficiently than transactions in other types of instruments. The Fund incurs costs in connection with opening and closing derivatives positions.

The use of derivatives can lead to losses because of adverse movements in the price or value of the reference instrument, due to failure of a counterparty or due to tax or regulatory constraints. Derivatives may create economic leverage in the Fund, which magnifies the Fund’s exposure to the reference instrument and magnifies potential losses. When derivatives are used to gain or limit exposure to a particular market or market segment, their performance may not correlate as expected to the performance of such market, thereby causing the Fund to fail to achieve its original purpose for using such derivatives. A decision as to whether, when and how to use derivatives involves the exercise of specialized skill and judgment, and a transaction may be unsuccessful in whole or in part because of market behavior, unexpected events or the Adviser’s failure to use derivatives effectively. Derivative instruments may be difficult to value, may be illiquid and may be subject to wide swings in valuation caused by changes in the value of the reference instrument.

Set forth below are examples of types of derivatives in which the Fund may invest:

Options Generally. The Fund writes (sells) and purchases put options on reference instruments, including equity indices. The premium, the exercise price and the market value of the applicable underlying instrument together will determine the gain or loss realized by the Fund as the seller of the option.

The value of options may be adversely affected if the market for such options becomes less liquid or smaller. The Fund's ability to close out its position as a seller or purchaser of an exchange listed put option ("put") is dependent, in part, upon the liquidity of the option market. An exchange-traded option position may be closed out only on a market that provides secondary trading for options of the same series, and there is no assurance that a liquid secondary market will exist for any particular option. The Fund might experience losses if it could not close out a position because of an illiquid market for the option.

The hours of trading for options may not conform to the hours during which the underlying instruments are traded. To the extent that the options markets close before the markets for the underlying instruments, significant price and rate movements can take place in the underlying markets that cannot be reflected in the options markets. Options are marked to market daily and their value will be affected by changes in the value of the underlying securities, changes in the dividend rates of the underlying securities, an increase in interest rates, changes in the actual or perceived volatility of the stock market and the underlying instruments and the remaining time to the options' expiration. Additionally, the exercise price of an option may be adjusted downward before the option's expiration as a result of the occurrence of certain corporate or other events affecting the underlying instrument, such as extraordinary dividends, stock splits, merger or other extraordinary distributions or events. A reduction in the exercise price of an option would reduce the Fund's capital appreciation potential on the underlying instrument.

The Fund could pay a brokerage commission each time it buys or sells a put. Those commissions could be higher on a relative basis than the commissions for direct purchases or sales of the underlying investments. Premiums paid for options are small in relation to the market value of the underlying investments. Consequently, put options offer large amounts of leverage. The leverage offered by trading in options could result in the Fund's net asset value being more sensitive to changes in the value of the underlying investment.

As a result of the Fund's option strategy and the possibility of leverage arising from the Fund's use of certain types of derivatives, the derivatives risk (described further above) will be significant in the Fund.

Put Options. The Fund can buy and sell exchange-traded puts, including index options. The Fund's options transactions potentially will result in a substantial portion of the Fund's income consisting of short-term capital gains, which are taxable to shareholders as ordinary income when distributed to them. An option position may be closed out only on a market that provides secondary trading for options of the same series, and there is no assurance that a liquid secondary market will exist for any particular option. The Fund might experience losses if it could not close out a position because of an illiquid market for the future or option.

- *Writing Put Options.* The Fund may write (that is, sell) put options. A put option gives the purchaser the right to sell, and the writer the obligation to buy, the underlying investment at the exercise price during the option period.

The premium the Fund receives from writing a put option represents a profit, as long as the price of the underlying investment remains equal to or above the exercise price. However, the Fund also assumes the obligation during the option period to buy the underlying investment from the buyer of the put option at the exercise price if the value of the investment falls below the exercise price.

If a put option the Fund has written expires unexercised, the Fund realizes a gain in the amount of the premium, less the transaction costs incurred. If the put option is exercised, the Fund must fulfill its obligation to pay the option purchaser an amount equal to the difference between the exercise price and market value of the underlying index. The Fund will incur a loss upon the exercise of the put option to the extent that the premium received (less the Fund's transaction costs) is less than the difference between the exercise price and the market value of the underlying index at the time the put option is exercised.

As long as the Fund's obligation as the put option writer continues, it may be assigned an exercise notice by the broker-dealer through which the put option was sold. That notice will require the Fund to take delivery of the underlying security and pay the exercise price. The Fund has no control over when it may be required to purchase the underlying security, since it may be assigned an exercise notice at any time prior to the termination of its obligation as the writer of the put option. That obligation terminates upon expiration of the put option. It may also terminate if, before it receives an exercise notice, the Fund effects a closing purchase transaction by purchasing a put option of the same series as it sold. Once the Fund has been assigned an exercise notice, it cannot effect a closing purchase transaction.

The Fund may decide to effect a closing purchase transaction to realize a profit on an outstanding put option it has written or to prevent the underlying security from being put. Effecting a closing purchase transaction will also permit the Fund to write another put option on the security, or to sell the security and use the proceeds from the sale for other investments. The Fund will realize a profit or loss from a closing purchase transaction depending on whether the net of the amount of the option transaction costs and the premium received on the put option the Fund wrote is more or less than the price of the put option the Fund purchases to close out the transaction.

- *Purchasing Put Options.* The Fund can buy put options on equity indices, which are settled in cash. Gain or loss depends on the change in market value of the index in question (and thus on price movements in the securities market generally). When the Fund purchases a put option, it pays a premium. The Fund benefits only if it sells the put option at a profit or if, during the exercise period, the difference between the exercise price and the market value of the underlying index exceeds the sum of the premium paid plus the transaction costs and the Fund exercises the put option. If the market price of the underlying investment is above the exercise price and, as a result, the put option is not exercised, the put option will become worthless on its expiration date.

Futures. The Fund may buy and sell futures contracts, including futures contracts on equity indices ("stock index futures"). The primary risks associated with the use of futures contracts and options are imperfect correlation, liquidity, unanticipated market movement and counterparty risk.

A broadly-based stock index is used as the basis for trading stock index futures. They may in some cases be based on equity securities of issuers in a particular industry or group of industries. A stock index assigns relative values to the securities included in the index and its value fluctuates in response to the changes in value of the underlying securities. A stock index cannot be purchased or sold directly. These contracts obligate the seller to deliver, and the purchaser to take, cash to settle the futures transaction. There is no delivery made of the underlying securities to settle the futures obligation. Either party may also settle the transaction by entering into an offsetting contract.

No money is paid or received by the Fund on the purchase or sale of a future. Upon entering into a futures transaction, the Fund will be required to deposit an initial margin payment with the futures commission merchant (the "FCM"). Initial margin payments will generally be deposited directly with the FCM. As the future is marked to market (that is, its value on the Fund's books is changed to reflect changes in its market value), subsequent margin payments, called variation margin, will be paid to or by the FCM daily.

At any time prior to expiration of the future, the Fund may elect to close out its position by taking an opposite position, at which time a final determination of variation margin is made and any additional cash must be paid by or released to that Fund. All futures transactions (except forward contracts) are effected through a clearinghouse associated with the exchange on which the contracts are traded.

Hedging with Derivatives — Risks. Although it is not obligated to do so, the Fund can use derivatives to hedge. The Fund can use hedging to attempt to protect against declines in the market value of that Fund's portfolio, to permit the Fund to retain unrealized gains in the value of portfolio securities that have

appreciated or to facilitate selling securities for investment reasons. The Fund can use hedging to establish a portfolio position as a temporary substitute for purchasing particular securities. In that case, the Fund would normally seek to purchase the securities and then terminate that hedging position. The Fund might also use this type of hedge to attempt to protect against the possibility that its portfolio securities would not be fully included in a rise in value of the market.

The Fund can use derivatives to hedge by taking or long or short positions in the underlying securities, related securities or other derivatives positions. To gain long investment exposure, the Fund may invest in securities directly. To gain short investment exposure, the Fund may use derivatives (including futures) and make short sales, including short sales of assets the Fund does not own. Some of the hedging strategies the Fund can use are described below. The Fund may use additional hedging strategies as discussed elsewhere in this SAI, and it may employ new hedging strategies when they are developed, if those investment methods are consistent with the Fund's investment objective and are permissible under applicable regulations governing the Fund.

The use of hedging strategies requires special skills and knowledge of investment techniques that are different than what is required for normal portfolio management. If the Adviser uses a hedging strategy at the wrong time or judges market conditions incorrectly, hedging strategies may reduce the Fund's return. The Fund could also experience losses if the prices of its hedging positions were not correlated with its other investments.

There is a risk in using short hedging by selling futures, or purchasing put options on broadly-based indices or futures to attempt to protect against declines in the value of the Fund's portfolio securities. The risk is that the prices of the futures or the value of the applicable index will correlate imperfectly with the behavior of the cash prices of the Fund's securities. For example, it is possible that while the Fund has used derivative instruments in a short hedge, the market may advance and the value of the securities held in the Fund's portfolio might decline. If that occurred, the Fund would lose money on the derivative instruments and also experience a decline in the value of its portfolio securities. If the Fund has used derivatives to hedge or otherwise reduce the Fund's risk exposure to a particular position and then disposes of that position at a time at which it cannot also settle, terminate or close out the corresponding hedge position, this may create short investment exposure. Certain "short" derivative positions involve investment leverage, and the amount of the Fund's potential loss is theoretically unlimited.

The risk of imperfect correlation increases as the composition of the Fund's portfolio diverges from the securities included in the applicable index. To compensate for the imperfect correlation of movements in the price of the portfolio securities being hedged and movements in the price of the hedging instruments, the Fund might use derivative instruments in a greater dollar amount than the dollar amount of portfolio securities being hedged. It might do so if the historical volatility of the prices of the portfolio securities being hedged is more than the historical volatility of the applicable index.

The ordinary spreads between prices in the cash and futures markets are subject to distortions, due to differences in the nature of those markets. First, all participants in the futures market are subject to margin deposit and maintenance requirements. Rather than meeting additional margin deposit requirements, investors may close futures contracts through offsetting transactions which could distort the normal relationship between the cash and futures markets. Second, the liquidity of the futures market depends on participants entering into offsetting transactions rather than making or taking delivery. To the extent participants decide to make or take delivery, liquidity in the futures market could be reduced, thus producing distortion. Third, from the point of view of speculators, the deposit requirements in the futures market are less onerous than margin requirements in the securities markets. Therefore, increased participation by speculators in the futures market may cause temporary price distortions.

The Fund can use derivative instruments to establish a position in the securities markets as a temporary substitute for the purchase of individual securities (long hedging) by buying futures. It is possible that when

the Fund does so the market might decline. If the Fund then concludes not to invest in securities because of concerns that the market might decline further or for other reasons, the Fund will realize a loss on the hedge position that is not offset by a reduction in the price of the securities purchased.

Additional Information Regarding Derivatives Counterparty Risk. The Fund is exposed to the credit risk of the counterparties with which, or the brokers, dealers and exchanges through which, it deals in derivatives, whether it engages in exchange traded or off-exchange transactions. If the Fund's FCM becomes bankrupt or insolvent, or otherwise defaults on its obligations to the Fund, the Fund may not receive all amounts owed to it in respect of its trading, despite the clearinghouse fully discharging all of its obligations. The Commodity Exchange Act ("CEA") requires an FCM to segregate all funds received from its customers with respect to cleared derivatives transactions from such FCM's proprietary funds.

If an FCM were not to do so to the full extent required by law, the assets of an account might not be fully protected in the event of the bankruptcy of an FCM. Furthermore, in the event of an FCM's bankruptcy, the Fund would be limited to recovering only a pro rata share of all available funds segregated on behalf of an FCM's combined customer accounts, even though certain property specifically traceable to the Fund (for example, U.S. Treasury bills deposited by the Fund) may be held by the FCM. FCM bankruptcies have occurred in which customers were unable to recover from the FCM's estate the full amount of their funds owed and on deposit with such FCM. Such situations could arise due to various factors, or a combination of factors, including inadequate FCM capitalization, inadequate controls on customer trading and inadequate customer capital. In addition, an FCM will generally provide the clearinghouse the net amount of variation margin required for cleared swaps for all of its customers in the aggregate, rather than individually for each customer. The Fund is, therefore, subject to the risk that a clearinghouse will not make variation margin payments owed to the Fund if another customer of the clearing member has suffered a loss and is in default. The Fund may also be subject to the risk that it will be required to provide additional variation margin to the clearinghouse before the clearinghouse will move the Fund's cleared derivatives transactions to another clearing member. Furthermore, in the event of the bankruptcy or insolvency of a clearinghouse, the Fund might experience a loss of funds deposited through its FCM as margin with the clearinghouse, a loss of unrealized profits on its open positions and the loss of funds owed to it as realized profits on closed positions. Such a bankruptcy or insolvency might also cause a substantial delay before the Fund could obtain the return of funds owed to it by an FCM who was a member of such clearinghouse.

Because bilateral derivative transactions are traded between counterparties based on contractual relationships, the Fund is subject to the risk that a counterparty will not perform its obligations under the related contracts. There can be no assurance that a counterparty will not default and that the Fund will not sustain a loss on a transaction as a result. In situations where the Fund is required to post margin or other collateral with a counterparty, the counterparty may fail to segregate the collateral or may commingle the collateral with the counterparty's own assets. As a result, in the event of the counterparty's bankruptcy or insolvency, the Fund's collateral may be subject to the conflicting claims of the counterparty's creditors, and the Fund may be exposed to the risk of a court treating the Fund as a general unsecured creditor of the counterparty, rather than as the owner of the collateral.

The Fund is subject to the risk that issuers of the Fund's portfolio instruments may default on their obligations under those instruments and that certain events may occur that have an immediate and significant adverse effect on the value of those instruments. There can be no assurance that an issuer of an instrument in which the Fund invests will not default or that an event that has an immediate and significant adverse effect on the value of an instrument will not occur and that the Fund will not sustain a loss on a transaction as a result.

Transactions entered into by the Fund may be executed on various U.S. and non-U.S. exchanges and may be cleared and settled through various clearinghouses, custodians, depositories and prime brokers throughout the world. Although the Fund attempts to execute, clear and settle the transactions through entities the Adviser believes to be sound, there can be no assurance that a failure by any such entity will not lead to a loss to the Fund.

Margin Risk. The Fund may post cash, securities or other assets as margin. The Fund may at times have significant margin obligations to broker-dealers or other entities as a result of listed derivatives positions. The Fund may use a tri-party collateral protection mechanism; tri-party arrangements may result in higher costs than if the Fund had posted margin directly. The Fund may also establish alternative collateral mechanisms in order to achieve a balance between cost and counterparty credit risk to the Fund, including posting collateral directly with a futures commission merchant, broker or the option clearinghouse.

Asset Segregation/Cover. To the extent obligations created by the Fund may be deemed to create “senior securities” (as defined in the 1940 Act), the Fund may be required to segregate or earmark liquid assets. The Fund segregates with its custodian or otherwise designates on its records (“earmarks”) cash, cash equivalents or liquid assets in an amount the Fund believes to be adequate to ensure that it has sufficient liquid assets to meet its obligations under its derivatives contracts, or the Fund may engage in other measures to “cover” its obligations with respect to such transactions. The amounts that are segregated or earmarked may be based on the derivative’s notional value or on the daily mark-to-market obligation under the derivatives contract and may be reduced by amounts on deposit with the applicable broker or counterparty to the derivatives transaction. The Fund may segregate or earmark amounts in addition to the amounts described above. For example, if the Fund writes a physically settled put option, it will typically segregate or earmark liquid assets equal to the exercise price of the option, less margin on deposit; if the Fund writes a cash settled put option, it will typically segregate or earmark liquid assets equal to the amount the option is in the money (meaning the difference between the exercise price of the option and the current market price of the reference instrument, when the exercise price of the option is higher than the market price of the reference instrument), marked to market on a daily basis, less margin on deposit. Alternatively, the Fund may, in certain circumstances, enter into an offsetting position rather than segregating or designating liquid assets (e.g., the Fund may cover a written put option with a purchased put option with the same or higher exercise price). Although the Adviser attempts to ensure that the Fund has sufficient liquid assets in respect of its obligations under its derivative contracts, it is possible that the Fund’s liquid assets may be insufficient to support such obligations under its derivatives positions. The Fund may be unable to use such segregated or earmarked assets for certain other purposes, which could result in the Fund earning a lower return on its portfolio than it might otherwise earn if it did not have to segregate those assets in respect of, or otherwise cover, such portfolio positions. To the extent the Fund’s assets are segregated or committed as cover, it could limit the Fund’s investment flexibility. The Fund may modify its asset segregation policies from time to time.

Regulatory Issues. With respect to the Fund, the Adviser has claimed an exclusion from the definition of the term CPO under the Commodity Exchange Act (the “CEA”) pursuant to CFTC Rule 4.5. Accordingly, the Adviser (with respect to the Fund) is not subject to registration or regulation as a CPO under the CEA.

As a result of the 2010 Dodd-Frank Wall Street Reform and Consumer Protection Act, the Commission and the CFTC require (or will require) a substantial portion of derivative transactions that are currently executed on a bilateral basis in the over-the-counter markets to be executed through a regulated securities, futures or swap exchange or swap execution facility and centrally cleared. Certain CFTC-regulated interest rate and credit derivatives have become subject to these requirements, but it is not yet clear when additional types of CFTC-regulated swaps will become so subject or when the parallel SEC requirements will go into effect. Among other things, in the United States, trades submitted for clearing will be subject to minimum initial and variation margin requirements set by the relevant clearinghouse, as well as possible Commission- or CFTC-mandated margin requirements. The Fund’s clearing members may require the Fund to provide collateral for cleared trades beyond regulatory and clearinghouse minimums. Additionally, U.S. regulators, the European Union and certain other jurisdictions have adopted minimum margin and capital requirements for uncleared OTC derivatives transactions. These rules impose minimum margin requirements on derivatives transactions between the Fund and its derivative counterparties and may increase the amount of margin the Fund is required to provide (and the costs associated with providing it). They also impose regulatory requirements on the types of collateral that may be provided and the timing of transferring margin, among other things.

Similar requirements have been adopted under Regulation (EU) No 648/2012 on OTC derivatives, central counterparties and trade repositories (known as the European Market Infrastructure Regulation, or “EMIR”), which imposes similar clearing and margin requirements that are expected to affect the Fund’s derivative activities with European Union-domiciled counterparties. The European Union regulatory framework for derivatives is also affected by the Markets in Financial Instruments Directive and its accompanying European Union Regulation (known respectively as “MiFID II” and “MiFIR”). Moreover, Regulation (EU) 2015/2365 on transparency of securities financing transactions and of reuse imposes requirements that may affect collateral arrangements entered into by the Fund with counterparties based in the European Union, whether in connection with derivative contracts, repurchase agreements or securities lending transactions.

New regulatory requirements may also limit the ability of the Fund to protect its interests in the event of an insolvency of a derivatives counterparty. In the event of a counterparty’s (or its affiliate’s) insolvency, the Fund’s ability to exercise remedies, such as the termination of transactions, netting of obligations and realization on collateral, could be stayed or eliminated under new special resolution regimes adopted in the United States, the European Union and various other jurisdictions. Such regimes provide government authorities with broad authority to intervene when a financial institution is experiencing financial difficulty. In particular, with respect to counterparties who are subject to such proceedings in the European Union, the liabilities of such counterparties to the Fund could be reduced, eliminated, or converted to equity in such counterparties (sometimes referred to as a “bail in”).

In October 2020, the Commission also adopted Rule 18f-4 (“Rule 18f-4”) under the 1940 Act providing for the regulation of a registered investment company’s use of derivatives and certain related instruments. Among other things, Rule 18f-4 limits a fund’s derivatives exposure through a value-at-risk (“VaR”) test and requires the adoption and implementation of a derivatives risk management program for certain derivatives users. In connection with the adoption of Rule 18f-4, the Commission also eliminated the asset segregation framework arising from prior Commission guidance for covering derivatives and certain financial instruments. Compliance with Rule 18f-4 will not be required until August 2022. When the Fund comes into compliance, the Fund’s treatment of investments or trading practices that involve contractual obligations to pay in the future will change. Most such investments or trading practices will be considered to be derivatives under Rule 18f-4, and will therefore be subject to the VaR test set forth in the rule. The approach to asset segregation and coverage requirements described in this SAI will also be impacted.

Legislative and regulatory measures may reduce the availability of some types of derivative instruments, may increase the cost of trading in or maintaining other instruments or positions and may cause uncertainty in the markets for a variety of derivative instruments, any or all of which could adversely affect the value or performance of the Fund. While legislative and regulatory measures may provide protections for some market participants, they are evolving and still being implemented and their effects on derivatives market activities cannot be reliably predicted.

Tax Issues. The Fund’s investments in options and other derivative instruments could affect the amount, timing and character of the Fund’s distributions; in some cases, the tax treatment of such investments may not be certain. The tax issues relating to these and other types of investments and transactions are described more fully under “Tax Status” below.

Additional Information Regarding Leverage. The Fund may use leverage. Although the use of leverage may create an opportunity for increased returns of the Fund, it also results in additional risks and can magnify the effect of any losses and thus could negatively impact the Fund’s business and results of operation and have important adverse consequences to the Fund’s investments. The loss on leverage transactions may substantially exceed the initial investment.

The terms of financing arrangements entered into by the Fund may restrict the Fund’s operating flexibility, including covenants that, among others, may limit the Fund’s ability to: (i) pay distributions in certain circumstances, (ii) incur additional debt and (iii) engage in certain transactions. If the Fund secures its leverage

through the pledging of collateral, the Fund may, if the Fund is unable to generate sufficient cash flow to meet principal and interest payments on its indebtedness, be subject to risk that it is required to surrender its collateral and that such collateral may be liquidated at inopportune times or at prices that are not favorable to the Fund and cause significant losses. If a lender seizes and liquidates pledged collateral, such collateral may be sold at distressed price levels. The Fund will fail to realize the full value of such asset in a distressed sale.

The Fund may be required to pay commitment fees and other costs of borrowings under the terms of a credit facility. Moreover, interest on borrowings will be an expense of the Fund. With the use of borrowings, there is a risk that the interest rates paid by the Fund on the amount it borrows will be higher than the return on the Fund's investments. Such additional costs and expenses may affect the operating results of the Fund.

If the Fund cannot generate sufficient cash flow from investments, it may need to refinance all or a portion of indebtedness on or before maturity. During the economic downturn that began in 2008, the U.S. capital markets experienced historic dislocations and liquidity disruptions, which caused financing to be unavailable in many cases and, even if available, caused the cost of prospective financings to increase. These circumstances have materially impacted liquidity in the debt markets, making financing terms for borrowers able to find financing less attractive and in many cases have resulted in the unavailability of certain types of debt financing. Uncertainty in the debt and equity markets may negatively impact the Fund's ability to access financing on favorable terms or at all. The inability to obtain additional financing could have a material adverse effect on the Fund's operations and on its ability to meet its debt obligations. If it is unable to refinance any of its indebtedness on commercially reasonable terms or at all, the Fund's returns may be harmed.

Additional Information Regarding Operational Risk. The Fund, its service providers and other market participants increasingly depend on complex information technology and communications systems to conduct business functions. These systems are subject to a number of different threats or risks that could adversely affect the Fund and its shareholders.

For example, unauthorized third parties may attempt to improperly access, modify, disrupt the operations of or prevent access to these systems or data within them (a "cyber attack"), whether systems of the Fund, the Fund's service providers, counterparties or other market participants. Power or communications outages, acts of God, information technology equipment malfunctions, operational errors (both human and systematic) and inaccuracies within software or data processing systems may also disrupt business operations or impact critical data. Market events also may occur at a pace that overloads current information technology and communication systems and processes of the Fund, the Fund's service providers or other market participants, impacting the ability to conduct the Fund's operations.

Cyber attacks, disruptions or failures that affect the Fund's service providers or counterparties may adversely affect the Fund and its shareholders, including by causing losses for the Fund or impairing Fund operations. In addition, cyber attacks, disruptions or failures may cause reputational damage and subject the Fund or its service providers to regulatory fines, litigation costs, penalties or financial losses, reimbursement or other compensation costs and/or additional compliance costs. The Fund and its service providers may also incur substantial costs for cyber-security risk management in order to prevent or mitigate cyber-security incidents, and the Fund and its shareholders could be negatively impacted as a result of such costs.

Similar types of operational (both human and systematic) and technology risks are also present for issuers of securities or other instruments in which the Fund invests, which could result in material adverse consequences for such issuers and may cause the Fund's investments to lose value. In addition, cyber attacks involving a Fund counterparty could affect such counterparty's ability to meet its obligations to the Fund, which may result in losses to the Fund and its shareholders. Furthermore, as a result of cyber attacks, disruptions or failures, an exchange or market may close or issue trading halts on specific securities or the entire market, which may result in, among other things, the Fund's inability to buy or sell certain securities or financial instruments or to accurately price its investments. The Fund cannot directly control any cyber-security plans or systems put in place by its service providers, Fund counterparties, issuers in which the Fund invests or securities markets and exchanges.

Equity Securities. The Fund may invest directly or indirectly in public or private equity securities, including common stock, preferred stock, convertible stock and/or warrants. Equity investments may afford the Fund voting rights as well as the opportunity to receive dividends and/or capital appreciation. The Fund may also invest directly or indirectly in equity securities of U.S. companies. Certain equity securities may be purchased because they may provide dividend income. These equity investments may take any of the following forms:

Common Stock. Holders of common stock generally have voting rights in the issuer and are entitled to receive common stock dividends when, as and if declared by the corporation's board of directors. Common stock normally occupies the most subordinated position in an issuer's capital structure

Preferred Stocks. Preferred stock, unlike common stock, has a stated dividend rate payable from the corporation's earnings. Preferred stock dividends may be cumulative or non-cumulative, participating or auction rate. "Cumulative" dividend provisions require all or a portion of prior unpaid dividends to be paid. Preferred stock may be "participating" stock, which means that it may be entitled to a dividend exceeding the stated dividend in certain cases. Preferred stock may have mandatory sinking fund provisions, as well as provisions allowing calls or redemption prior to maturity, which also can have a negative impact on prices when interest rates decline. Preferred stock may pay fixed or adjustable rates of return. Preferred stock generally pays a dividend and ranks ahead of common stocks and behind debt securities in claims for dividends and for assets of the issuer in a liquidation or bankruptcy.

Rights and Warrants. Warrants are securities permitting the holder to purchase equity securities at specific prices valid for a specific period of time. Their values do not necessarily move parallel to the prices of the underlying securities. Rights are similar to warrants, but normally have a short duration and certain other distinguishing features. Rights and warrants are typically distributed directly by the issuer to its shareholders. Rights and warrants have no voting rights, receive no dividends and have no rights with respect to the assets of the issuer unless and until they are exercised for the underlying equity securities.

Convertible Securities. Convertible securities are debt securities or preferred stock that may be converted in whole or in part into common stock or other equity securities. Their prices do not necessarily move parallel to the prices of the underlying securities. Convertible securities generally have no voting rights. The value of a convertible security is a function of its "bond value," which is the value of the debt or preferred stock component of the security, and its "conversion value," which is the value of the right to convert the securities into common stock or other equity securities. The bond value will likely increase when interest rates fall and decrease when interest rates rise, and the conversion value will likely increase when the value of the underlying equity security increases and decrease when the value of the underlying equity security decreases. If the bond value is relatively high compared to the conversion value, the security will behave more like a debt security, and if the conversion value is relatively high compared to the bond value, the security will behave more like an equity security.

Additional Information Regarding Risks of Investing in Equities. Equities fluctuate in price, and their short-term volatility at times may be great. Many factors can affect a particular equity security's price, such as poor earnings reports by the issuer, loss of major customers, major litigation against the issuer or changes in government regulations affecting the issuer or its industry. To the extent that the Fund obtains exposure to equity securities, the value of that Fund's portfolio will be affected by changes in the stock markets. Market risk can affect the Fund's net asset value per share, which will fluctuate as the values of the Fund's portfolio securities change. The prices of individual equity securities do not all move in the same direction uniformly or at the same time. Different stock markets may behave differently from one another. The value of preferred securities will usually react more strongly than bonds and other debt to actual or perceived changes in the company's financial condition or prospects. Preferred securities may also be sensitive to changes in interest rates. When interest rates rise, the fixed dividend on preferred securities may be less attractive, causing the price of preferred stocks to decline. Preferred securities of smaller companies may be more vulnerable to adverse developments than preferred stock of larger companies.

Small and Mid-Capitalization Investing. The Fund may gain exposure to the securities of small capitalization companies, ETFs whose portfolios consist primarily of common stocks of small-capitalization companies, mid-capitalization companies, recently organized companies and derivative instruments related to those securities. Historically, such securities, and particularly securities of smaller capitalization companies, have been more volatile in price than those of larger capitalization, more established companies. Many of the risks that apply to small capitalization companies also apply to mid-capitalization companies, and such companies are included in the term “small capitalization companies” for the purposes of this risk factor. The securities of small capitalization and recently organized companies pose greater investment risks because such companies may have limited product lines, distribution channels and financial and managerial resources. In particular, small capitalization companies may be operating at a loss or have significant variations in operating results; may be engaged in a rapidly changing business with products subject to substantial risk of obsolescence; may require substantial additional capital to support their operations, to finance expansion or to maintain their competitive position; and may have substantial borrowings or may otherwise have a weak financial condition. In addition, these companies may face intense competition, including competition from companies with greater financial resources, more extensive development, manufacturing, marketing and other capabilities, and a larger number of qualified managerial and technical personnel. The equity securities of small capitalization companies are often traded over the counter or on regional exchanges and may not be traded in the volumes typical on a national securities exchange. Consequently, the Fund or entities in which the Fund obtains exposure may be required to dispose of such securities or remain in a short position over a longer (and potentially less favorable) period of time than is required to dispose of or close out of a short position with respect to the securities of larger, more established companies. Investments in equity or debt instruments issued by small capitalization companies may also be more difficult to value than other types of securities because of the foregoing considerations as well as, if applicable, lower trading volumes. Investments in companies with limited or no operating histories are more speculative and entail greater risk than do investments in companies with an established operating record.

Large Capitalization Investing. The equity securities of large capitalization companies can perform differently from other segments of the equity market as a whole. Companies with large capitalization tend to go in and out of favor based on market and economic conditions and, while they can be less volatile than companies with smaller capitalizations, they may also be less flexible in evolving markets or unable to implement changes as quickly as their smaller counterparts. Accordingly, the value of equity securities issued by large capitalization companies may not rise to the same extent as the value of equity securities issued by small or mid-cap companies under certain market conditions or during certain periods. Market capitalizations of companies change over time.

Preferred Securities Investing. Preferred securities may pay fixed or adjustable rates of return. Preferred securities are subject to issuer-specific and market risks applicable generally to equity securities. In addition, preferred securities generally pay a dividend and rank ahead of common stocks and behind debt securities in claims for dividends and for assets of the issuer in a liquidation or bankruptcy. For this reason, the value of preferred securities will usually react more strongly than bonds and other debt to actual or perceived changes in the company’s financial condition or prospects. Preferred securities may also be sensitive to changes in interest rates. When interest rates rise, the fixed dividend on preferred securities may be less attractive, causing the price of preferred stocks to decline. Preferred securities of smaller companies may be more vulnerable to adverse developments than preferred stock of larger companies.

Exchange-Traded Funds. The Fund may invest directly or indirectly in ETFs, which are investment companies or special purpose trusts typically designed to provide investment results that generally correspond (on a direct basis or on a multiple, inverse or multiple inverse basis) to the performance of an index. ETFs are listed on an exchange and trade in the secondary market on a per-share basis. The Fund may purchase and sell individual shares of ETFs in the secondary market. These secondary market transactions require the payment of commissions. Typically, the ETF bears its own operational expenses, which are deducted from its assets. To the extent that the Fund invests in ETFs, the Fund must bear these expenses in addition to the expenses of its own operation. As a result, the cost of investing in ETF shares may exceed the costs of investing directly in its underlying investments.

Investments in ETFs are subject to the same risks as investments in other investment companies, as described above. Certain risks of investing in an index-based ETF are similar to those of investing in an indexed mutual fund, including tracking error risk (the risk of errors in matching the ETF's underlying assets to the index) and the risk that because an ETF is not actively managed, it cannot sell poorly performing stocks as long as they are represented in the index. The values of ETFs are subject to change as the values of their component assets fluctuate according to market volatility. ETFs may trade in the secondary market at a discount from their NAVs. The Fund may purchase ETFs at prices that exceed the net asset value of their underlying investments and may sell ETF investments at prices below such net asset value. Because the market price of ETF shares depends on the demand in the market for them, the market price of an ETF may be more volatile than the underlying portfolio of securities the ETF is designed to track, and the Fund may not be able to liquidate ETF holdings at the time and price desired, which may impact Fund performance. Furthermore, there may be times when the exchange halts trading, in which case the investors owning ETF shares would be unable to sell them until trading is resumed. In addition, because ETFs often invest in a portfolio of common stocks and "track" a designated index, an overall decline in stocks comprising an ETF's benchmark index could have a greater impact on the ETF and investors than might be the case in an investment company with a more widely diversified portfolio. Losses could also occur if the ETF is unable to replicate the performance of the chosen benchmark index. As a result of mathematical compounding and because most leveraged and inverse ETFs have a single day investment objective to track the performance of an index or a multiple thereof, the performance of an ETF for periods greater than a single day is likely to be either greater than or less than the index performance, before accounting for the ETF's fees and expenses. Compounding will cause longer term results to vary from the return of the index for leveraged and inverse ETFs, particularly during periods of higher index volatility.

Other risks associated with ETFs include the possibility that: (i) an ETF's distributions may decline if the issuers of the ETF's portfolio securities fail to continue to pay dividends; and (ii) under certain circumstances, an ETF could be terminated. Should termination occur, the ETF could have to liquidate its portfolio when the prices for those assets are falling. In addition, inadequate or irregularly provided information about an ETF or its investments could expose investors in ETFs to unknown risks.

Debt Investments. The Fund can invest directly or indirectly in debt securities. The Fund may have exposure to the debt securities of U.S. issuers. These debt securities may have fixed or floating interest rates; may or may not be collateralized; and may be below investment grade. The Fund has no limits as to the maturity of debt securities in which it invests directly or indirectly or as to the market capitalization range of the issuers. The Fund does not have investment policies establishing specific maturity ranges for its investments, and it may be within any maturity range (short, medium or long) depending on the Adviser's evaluation of investment opportunities available within the debt securities markets.

The values of debt securities (and other income-producing securities, such as preferred securities and convertible securities) to which the Fund is exposed change in response to interest rate changes. In general, the value of a debt security is likely to fall as interest rates rise. This risk is generally greater for obligations with longer maturities or for debt securities that do not pay current interest (such as zero-coupon securities). Debt securities with floating interest rates can be less sensitive to interest rate changes, although, to the extent the Fund's income is based on short-term interest rates that fluctuate over short periods of time, income received by the Fund may decrease as a result of a decline in interest rates. In response to an interest rate decline, debt securities that provide the issuer with the right to call or redeem the security prior to maturity may be called or redeemed. If a debt security is repaid more quickly than expected, the Fund may not be able to reinvest the proceeds at the same interest rate, reducing the potential for gain. When interest rates increase or for other reasons, debt securities may be repaid more slowly than expected. As a result, the maturity of the debt instrument is extended, increasing the potential for loss.

Interest rate changes can be sudden and unpredictable, and the Fund may lose money if these changes are not anticipated by the Adviser. A wide variety of factors can cause interest rates to fluctuate (e.g., central bank monetary policies, inflation rates, general economic conditions and market developments), and debt securities may be difficult to value during such periods. Over the past decade, governmental financial regulators, including

the U.S. Federal Reserve, have taken steps to maintain historically low interest rates by purchasing bonds. Continued economic recovery, the U.S. Federal Reserve's conclusion of its quantitative easing program and recent increases in interest rates could increase the probability that interest rates will continue to rise in the near future. To the extent the U.S. Federal Reserve continues to raise interest rates, there is a risk that rates across the financial system may rise, which could have an adverse effect on prices for debt securities and on the management of the Fund.

In addition, while debt securities markets have consistently grown over the past three decades, the capacity for traditional dealer counterparties to engage in debt securities trading has not kept pace and in some cases has decreased. As a result, dealer inventories of debt securities, which provide a core indication of the ability of financial intermediaries to "make markets," are at or near historic lows in relation to market size. Because market makers provide stability to a market through their intermediary services, any significant reduction in dealer inventories could potentially lead to decreased liquidity and increased volatility in the debt securities markets.

Corporate Debt Securities. The Fund can purchase or gain exposure to a variety of debt securities of varying maturities issued by U.S. corporations, partnerships or other business entities. Corporate debt securities include bills, notes, debentures, money market instruments and similar instruments and securities and are generally used by corporations and other issuers to borrow money from investors for such purposes as working capital or capital expenditures. The issuer pays the investor a variable or fixed rate of interest and normally must repay the amount borrowed on or before maturity. Certain bonds are "perpetual" in that they have no maturity date. The debt securities in which the Fund is directly or indirectly invested may be subordinate to other liabilities of the issuer. If a borrower becomes insolvent, the borrower's assets may be insufficient to meet its obligations to the holders of its subordinated debt. The investment return of corporate debt securities reflects interest earnings and changes in the market value of the security.

Below Investment Grade Securities. The Fund can invest directly or indirectly in below-investment-grade fixed income securities. Below investment grade debt securities, which are commonly called "junk bonds," are bonds rated below BBB- by Standard & Poor's Ratings Services ("S&P") or Baa3 by Moody's Investors Service, Inc., ("Moody's") or that have comparable ratings by another rating organization. Securities held directly or indirectly by the Fund may be downgraded to below investment grade status after the Fund purchases them. Issuers of high yield debt are in many cases highly leveraged, and their relatively high debt-to-equity ratios create increased risks that their operations might not generate sufficient cash flow to service their debt obligations. Issuers of high yield debt may also be in poor financial condition, face special competitive or product obsolescence problems or be in bankruptcy or other reorganizations or corporate liquidations.

Obligations Issued or Guaranteed by U.S. Government Agencies or Instrumentalities. These include direct obligations and mortgage-related securities that have different levels of credit support from the U.S. government. Some are supported by the full faith and credit of the United States, such as Government National Mortgage Association pass-through mortgage certificates. Some are supported by the right of the issuer to borrow from the U.S. Treasury under certain circumstances, such as Federal National Mortgage Association ("Fannie Mae") bonds and Federal Home Loan Mortgage Corporation ("Freddie Mac") obligations. Others are supported only by the credit of the entity that issued them. Securities issued by Fannie Mae and Freddie Mac are also supported by commitments from the U.S. Treasury to purchase certain of those agencies' securities during market conditions in which the U.S. Treasury deems it necessary for the promotion of market stability. In September 2008, the Federal Housing Finance Agency ("FHFA"), an independent regulatory agency, placed the Federal National Mortgage Association and Federal Home Loan Mortgage Corporation into conservatorship. The U.S. Department of Treasury also entered into a secured lending credit facility with those companies and a preferred stock purchase agreement. The preferred stock purchase agreement was designed to ensure that each company maintain a positive net worth, be able to meet its outstanding obligations and continue providing liquidity to the mortgage market.

Under the Federal Housing Finance Regulatory Reform Act of 2008 (the "Reform Act"), which was included as part of Housing and Economic Recovery Act of 2008, FHFA, as conservator or receiver, has the power to

repudiate any contract entered into by Fannie Mae or Freddie Mac prior to FHFA's appointment as conservator or receiver, as applicable, if FHFA determines, in its sole discretion, that performance of the contract is burdensome and that repudiation of the contract promotes the orderly administration of Fannie Mae's or Freddie Mac's affairs. The Reform Act requires FHFA to exercise its right to repudiate any contract within a reasonable period of time after its appointment as conservator or receiver.

FHFA, in its capacity as conservator, has indicated that it has no intention to repudiate the guaranty obligations of Fannie Mae or Freddie Mac because FHFA views repudiation as incompatible with the goals of the conservatorship. However, in the event that FHFA, as conservator or if it is later appointed as receiver for Fannie Mae or Freddie Mac, were to repudiate any such guaranty obligation, the conservatorship or receivership estate, as applicable, would be liable for actual direct compensatory damages in accordance with the provisions of the Reform Act. Any such liability could be satisfied only to the extent of Fannie Mae's or Freddie Mac's available assets. The future financial performance of Fannie Mae and Freddie Mac is heavily dependent on the performance of the U.S. housing market.

Zero-Coupon Securities. The Fund can invest in zero-coupon securities. Zero-coupon U.S. government securities will typically be U.S. Treasury notes and U.S. Treasury bonds that have been stripped of their interest coupons or certificates representing interests in those stripped debt obligations and coupons.

Zero-coupon securities do not make periodic interest payments and are sold at a deep discount from their face value at maturity. The buyer recognizes a rate of return determined by the gradual appreciation of the security, which is redeemed at face value on a specified maturity date. This discount depends on the time remaining until maturity, as well as prevailing interest rates, the liquidity of the security and the credit quality of the issuer. The discount typically decreases as the maturity date approaches.

Because zero-coupon securities pay no interest and compound semi-annually at the rate fixed at the time of their issuance, their value is generally more volatile than the value of other debt securities that pay interest. Their value may fall more dramatically than the value of interest-bearing securities when interest rates rise. When prevailing interest rates fall, zero-coupon securities tend to rise more rapidly in value because they have a fixed rate of return.

The Fund's investment in zero-coupon securities may cause the Fund to recognize income for federal income tax purposes without a corresponding receipt of cash; this can require the Fund to dispose of investments, including when not otherwise advantageous to do so, to meet distribution requirements.

The Fund may also invest in zero-coupon and delayed interest securities and "stripped" securities of U.S. corporations. These are similar in structure to zero-coupon and "stripped" U.S. government securities, but will not be backed by the "full faith and credit" of the U.S. government. Zero-coupon securities issued by corporations will be subject to greater credit risks than U.S. government zero-coupon securities.

Other "Stripped" Securities. In addition to buying stripped Treasury securities (as described herein), the Fund can invest in stripped mortgage-related securities that are created by segregating the cash flows from underlying mortgage loans or mortgage securities to create two or more new securities. Each has a specified percentage of the underlying security's principal or interest payments. These are a form of derivative investment.

Mortgage securities may be partially stripped so that each class receives some interest and some principal. However, they may be completely stripped. In that case all of the interest is distributed to holders of one type of security, known as an "interest-only" security, or "I/O," and all of the principal is distributed to holders of another type of security, known as a "principal-only" security or "P/O." Strips can be created for pass-through certificates or collateralized mortgage obligations (CMOs).

The yields to maturity of I/Os and P/Os are very sensitive to principal repayments (including prepayments) on the underlying mortgages. If the underlying mortgages experience greater than anticipated prepayments of

principal, the Fund might not fully recoup its investment in an I/O based on those assets. If underlying mortgages experience less than anticipated prepayments of principal, the yield on the P/Os based on them could decline substantially.

Floating Rate and Variable Rate Obligations. The Fund can invest directly or indirectly in debt securities that have floating or variable interest rates. Those variable rate obligations may have a demand feature that allows the Fund to tender the obligation to the issuer or a third party prior to its maturity. The tender may be at par value plus accrued interest, according to the terms of the obligations.

Because the interest rates on floating rate bonds adjust periodically to reflect current market rates, falling short-term interest rates should tend to decrease the income payable to the Fund on its floating rate investments and rising rates should tend to increase that income. However, investments in floating rate and variable rate obligations should also mitigate the fluctuations in the Fund's net asset values during periods of changing interest rates, compared to changes in values of fixed-rate debt securities. Nevertheless, changes in interest rates can affect the value of the Fund's floating rate investments, especially if rates change sharply in a short period, because the resets of the interest rates on the investments occur periodically and will not all happen simultaneously with changes in prevailing rates. Having a shorter average reset period for its portfolio of investments may help mitigate that risk.

The interest rate on a floating rate demand note is adjusted automatically according to a stated prevailing market rate, such as the Prime Rate, the 91-day U.S. Treasury Bill rate or some other standard. The instrument's rate is adjusted automatically each time the base rate is adjusted. The interest rate on a variable rate note is also based on a stated prevailing market rate but is adjusted automatically at specified intervals. Generally, the changes in the interest rate on such securities reduce the fluctuation in their market value. As interest rates decrease or increase, the potential for capital appreciation or depreciation is less than that for fixed-rate obligations of the same maturity.

Floating rate and variable rate demand notes that have a stated maturity in excess of one year may have features that permit the holder to recover the principal amount of the underlying security at specified intervals not exceeding one year and upon no more than 30 days' notice. The issuer of that type of note normally has a corresponding right in its discretion, after a given period, to prepay the outstanding principal amount of the note plus accrued interest. Generally the issuer must provide a specified number of days' notice to the holder. The Fund can also invest directly or indirectly in step-coupon bonds that have a coupon rate that changes periodically during the life of the security on pre-determined dates that are set when the security is issued.

Additional Information Regarding Borrowing Risk. The Fund may borrow to meet redemption requests or for investment purposes (*i.e.*, to purchase additional portfolio securities). The Fund's investment portfolio may limit the number of lenders willing to enter into a borrowing arrangement with the Fund, result in higher borrowing costs to the Fund, or less favorable terms under the arrangement because such securities are higher risk instruments. As a result, the Fund may be required to modify its investment program in order to meet the terms of any borrowing arrangement. If so, the Fund may not meet its investment objective.

LIBOR Risk. The terms of many investments, financings or other transactions have been historically tied to the London Interbank Offered Rate, or "LIBOR." LIBOR is the offered rate at which major international banks can obtain wholesale, unsecured funding, and LIBOR may be available for different durations (e.g., 1 month or 3 months) and for different currencies. LIBOR may be a significant factor in determining payment obligations under derivative investments, the cost of financing or an investment's value or return, and may be used in other ways that affect the Fund's investment performance. In July 2017, the Financial Conduct Authority, the United Kingdom's financial regulatory body, announced that after 2021 it will cease its active encouragement of banks to provide the quotations needed to sustain LIBOR. On November 30, 2020, the administrator of LIBOR announced a delay in the phase out of a majority of the U.S. dollar LIBOR publications until June 30, 2023, with the remainder of LIBOR publications to still end at the end of 2021. LIBOR may cease to be published after that time. In addition, the E.U. Benchmarks Regulation imposed conditions under which only compliant benchmarks

may be used in new contracts after 2021. Various financial industry groups have begun planning for that transition, but there are obstacles to converting certain securities and transactions to a new benchmark. Transition planning is at an early stage and the nature of a substitute rate, if any, is unknown, and neither the effect of the transition process nor its ultimate success is certain. To identify a successor rate for U.S. dollar LIBOR, the Alternative Reference Rates Committee (“ARRC”), a U.S.-based group convened by the Federal Reserve Board and the Federal Reserve Bank of New York, was formed. The ARRC has identified the Secured Overnight Financing Rate (“SOFR”) as its preferred alternative rate for LIBOR. SOFR is a measure of the cost of borrowing cash overnight, collateralized by U.S. Treasury securities, and is based on directly observable U.S. Treasury-backed repurchase transactions. Although SOFR appears to be the preferred replacement rate for U.S. dollar LIBOR, at this time, it is not possible to predict the effect of any such changes, any establishment of alternative reference rates or other reforms to LIBOR that may be enacted in the United States, United Kingdom or elsewhere.

The transition process might lead to increased volatility and illiquidity in markets for instruments whose terms currently include LIBOR. It could also lead to a reduction in the value of some LIBOR-based investments and reduce the effectiveness of new hedges placed against existing LIBOR-based investments. While some LIBOR-based instruments may contemplate a scenario where LIBOR is no longer available by providing for an alternative rate-setting methodology and/or increased costs for certain LIBOR-related instruments or financing transactions, not all may have such provisions and there may be significant uncertainty regarding the effectiveness of any such alternative methodologies, resulting in prolonged adverse market conditions. Although the Fund is not directly exposed to LIBOR via its own investments, any such uncertainty or adverse market positions may affect the broader financial markets in general and the Fund in particular. For example, if difficulties in the transition from LIBOR were to cause increased volatility in the value of the S&P 500 index or the U.S. Treasury market, it could adversely impact the instruments in which the Fund invests, and could result in adverse performance for the Fund. Since the usefulness of LIBOR as a benchmark could deteriorate during the transition period, these effects could occur prior to the end of 2021. There also remains uncertainty and risk regarding the willingness and ability of issuers to include enhanced provisions in new and existing contracts or instruments. All of the aforementioned may adversely affect the Fund’s performance or NAV.

“When-Issued” and “Delayed-Delivery” Transactions. The Fund may invest in securities on a “when-issued” basis and may purchase or sell securities on a “delayed-delivery” (or “forward-commitment”) basis. “When-issued” and “delayed-delivery” are terms that refer to securities whose terms and indenture are available and for which a market exists, but which are not available for immediate delivery.

When such transactions are negotiated, the price (which is generally expressed in yield terms) is fixed at the time the commitment is made. Delivery and payment for the securities take place at a later date. The securities are subject to change in value from market fluctuations during the period until settlement. The value at delivery may be less than the purchase price. For example, changes in interest rates in a direction other than that expected by the Adviser before settlement will affect the value of such securities and may cause a loss to the Fund. During the period between purchase and settlement, the Fund makes no payment to the issuer and no interest accrues to the Fund from the investment until it receives the security at settlement.

The Fund may engage in when-issued transactions to secure what the Adviser considers to be an advantageous price and yield at the time the obligation is entered into. When the Fund enters into a when-issued or delayed-delivery transaction, it relies on the other party to complete the transaction. Its failure to do so may cause the Fund to lose the opportunity to obtain the security at a price and yield the Adviser considers to be advantageous.

When the Fund engages in when-issued and delayed-delivery transactions, it does so for the purpose of acquiring or selling securities consistent with its investment objective and policies or for delivery pursuant to options contracts it has entered into, and not for the purpose of investment leverage. Although the Fund’s purpose in entering into delayed-delivery or when-issued purchase transactions is to acquire securities, it may dispose of a commitment prior to settlement. If the Fund chooses to dispose of the right to acquire a when-issued security prior to its acquisition or to dispose of its right to delivery or receive against a forward commitment, it may incur a gain or loss.

At the time the Fund makes the commitment to purchase or sell a security on a when-issued or delayed-delivery basis, it records the transaction on its books and reflects the value of the security purchased in determining the Fund's net asset value. In a sale transaction, it records the proceeds to be received. The Fund identifies on its books liquid assets at least equal in value to the value of the Fund's purchase commitments until the Fund pays for the investment.

When-issued and delayed-delivery transactions can be used by the Fund as a defensive technique to hedge against anticipated changes in interest rates and prices. For instance, in periods of rising interest rates and falling prices, the Fund might sell securities in its portfolio on a forward commitment basis to attempt to limit its exposure to anticipated falling prices. In periods of falling interest rates and rising prices, the Fund might sell portfolio securities and purchase the same or similar securities on a when-issued or delayed-delivery basis to obtain the benefit of currently higher cash yields.

Legal and Regulatory Risks. The Fund may be adversely affected by new (or revised) laws or regulations that may be imposed by the CFTC, the Commission, the U.S. Federal Reserve or other banking regulators, or other governmental regulatory authorities or self-regulatory organizations that supervise the financial markets. The Fund may also be adversely affected by changes in the enforcement or interpretation of existing statutes and rules. In addition, the securities and futures markets are subject to comprehensive statutes, regulations and margin requirements. The CFTC, the Commission, the Federal Deposit Insurance Corporation, other regulators and self-regulatory organizations and exchanges are authorized to take extraordinary actions in the event of market emergencies. The regulation of derivatives transactions and funds that engage in such transactions is an evolving area of law and is subject to modification by government and judicial action.

New regulations could, among other things, adversely affect the value of the investments held by the Fund, restrict the Fund's ability to engage in derivatives transactions (for example, by making certain types of derivatives transactions no longer available to the Fund) and/or increase the costs of such derivatives transactions (for example, by increasing margin or capital requirements) and the Fund's ability to execute certain investment strategies may be adversely affected as a result. It is unclear how the regulatory changes will affect counterparty risk.

If a perception develops that there is or in the future could be renewed regulatory focus on participants who benefit from their participation in any U.S. government-sponsored program, or attempts by legislative and/or regulatory bodies to impose new restrictions and/or taxes and penalties on such participants, possibly even with retroactive effect, then the Fund's position in such securities may be compromised.

Investment in Relatively New Issuers. The Fund may occasionally gain exposure to the equities of selected new issuers. Direct or indirect investments in relatively new issuers, *i.e.*, those having continuous operating histories of less than three years, may carry special risks and may be more speculative because such companies are relatively unseasoned. Such companies also may lack sufficient resources, may be unable to generate internally the funds necessary for growth and may find external financing to be unavailable on favorable terms or even totally unavailable. Those companies will often be involved in the development or marketing of a new product with no established market, which could lead to significant losses. The securities of such issuers may have a limited trading market, which may adversely affect their disposition and can result in their being priced lower than might otherwise be the case. If other investors who invest in such issuers trade the same securities when the Fund attempts to dispose of its holdings, the Fund may receive lower prices than might otherwise be the case.

Adjustable Rate and Auction Preferred Securities. The Fund may invest in adjustable rate or auction rate preferred securities. Typically, the dividend rate on an adjustable rate preferred security is determined prospectively each quarter by applying an adjustment formula established at the time of issuance of the security. Although adjustment formulas vary among issues, they typically involve a fixed premium or discount relative to rates on specified debt securities issued by the U.S. Treasury. Typically, an adjustment formula will provide for a fixed premium or discount adjustment relative to the highest base yield of three specified U.S. Treasury securities: the 90-day Treasury bill, the 10-year Treasury note and the 20-year Treasury bond. The premium or

discount adjustment to be added to or subtracted from this highest U.S. Treasury base rate yield is fixed at the time of issue and cannot be changed without the approval of the holders of the security. The dividend rate on other preferred securities, commonly known as auction preferred securities, is adjusted at intervals that may be more frequent than quarterly, such as every 49 days, based on bids submitted by holders and prospective purchasers of such securities and may be subject to stated maximum and minimum dividend rates. The issues of most adjustable rate and auction preferred securities currently outstanding are perpetual, but are redeemable after a specified date at the option of the issuer. Certain issues supported by the credit of a high-rated financial institution provide for mandatory redemption prior to expiration of the credit arrangement. No redemption can occur if full cumulative dividends are not paid. Although the dividend rates on adjustable and auction preferred securities generally are adjusted or reset frequently, the market values of these preferred securities still may fluctuate in response to changes in interest rates. Market values of adjustable preferred securities also may substantially fluctuate if interest rates increase or decrease once the maximum or minimum dividend rate for a particular security is approached.

Portfolio Turnover. Purchases and sales of portfolio investments may be made as considered advisable by the Adviser in the best interests of the shareholders. The Fund's portfolio turnover rate may vary from year-to-year, as well as within a year. The Fund's distributions of any net short-term capital gains realized from portfolio transactions are taxable to shareholders as ordinary income. In addition, higher portfolio turnover rates can result in corresponding increases in portfolio transaction costs for the Fund.

For reporting purposes, the Fund's portfolio turnover rate is calculated by dividing the lesser of purchases or sales of portfolio securities for the fiscal year by the monthly average of the value of the portfolio securities owned by the Fund during the fiscal year. In determining such portfolio turnover, all securities whose maturities at the time of acquisition were one year or less are excluded. A 100% portfolio turnover rate would occur, for example, if all of the securities in the Fund's investment portfolio (other than short-term money market securities) were replaced once during the fiscal year. Portfolio turnover will not be a limiting factor should the Adviser deem it advisable to purchase or sell securities.

The historical portfolio turnover rate for the Fund is shown under the heading "Financial Highlights" in the Fund's Prospectus. Changes in portfolio turnover rates are generally anticipated to be the result of increased or decreased trading volume in long-term securities.

Fundamental Investment Restrictions of the Fund

The following investment restrictions of the Fund are designated as fundamental policies and as such cannot be changed without the approval of the holders of a majority of the Fund's outstanding voting securities. Under the 1940 Act, a "majority" vote is defined as the vote of the holders of the lesser of: (a) 67% or more of the shares of the Fund present at a meeting if the holders of more than 50% of the outstanding shares are present or represented by proxy at the meeting; or (b) more than 50% of the outstanding shares of the Fund.

Under these restrictions, the Fund:

- (1) may not issue senior securities, except as permitted borrowings or as otherwise permitted under the 1940 Act;¹
- (2) may not borrow money, except to the extent permitted under the 1940 Act;

¹ Section 18(f)(1) of the 1940 Act generally prohibits registered open-end investment companies from issuing senior securities other than with respect to bank borrowings. Section 18(g) defines "senior security," in pertinent part, as "any bond, debenture, note, or similar obligation or instrument constituting a security and evidencing indebtedness and any stock of a class having priority over any other class as to distribution of assets or payment of dividends." To the extent obligations created by the Fund may be deemed to create senior securities the Fund will segregate or earmark liquid assets with its custodian in accordance with 1940 Act Release No. 10666 (Apr. 18, 1979), and the guidance of related no-action letters issued by the Commission, to cover these obligations.

(3) may not underwrite securities issued by other persons except to the extent that, in connection with the disposition of its portfolio investments, it may be deemed to be an underwriter under federal securities laws;

(4) may not purchase or sell real estate, although it may purchase securities of issuers which deal in real estate, including securities of real estate investment trusts, and may purchase securities which are secured by interests in real estate;

(5) may not make loans, except by purchase of debt obligations in which the Fund may invest consistent with its investment policies, by entering into repurchase agreements, or by lending its portfolio securities. The Fund may loan no more than one-third of its total assets;

(6) may not purchase or sell commodities, except that the Fund may purchase and sell futures contracts and options, may enter into foreign exchange contracts, and may enter into swap agreements and other financial transactions not requiring the delivery of physical commodities; and

(7) may not invest more than 25% of its net assets in a particular industry or group of industries (other than securities issued or guaranteed by the U.S. government or its agencies or instrumentalities).

In determining whether a transaction is permitted under the 1940 Act, restriction (1) above will not be construed to prohibit any transaction that is permitted under the 1940 Act, as interpreted or modified, or as otherwise permitted by regulatory authority having jurisdiction from time to time.

All percentage limitations on investments will apply at the time of investment and shall not be considered violated unless an excess or deficiency occurs or exists immediately after and as a result of such investment. Except for the investment restrictions listed above as fundamental or to the extent designated as such in the Prospectus, the other investment policies described in this SAI or in the Prospectus are not fundamental and may be changed by approval of the Trustees.

The 1940 Act permits an open-end investment company to borrow money from a bank so long as the ratio which the value of the total assets of the investment company (including the amount of any such borrowing), less the amount of all liabilities and indebtedness (other than such borrowing) of the investment company, bears to the amount of such borrowing is at least 300%. The 1940 Act provides that, in the event that such asset coverage shall at any time fall below 300%, a mutual fund shall, within three days thereafter (not including Sundays and holidays) or such longer period as the Commission may prescribe by rules and regulations, reduce the amount of its borrowings to such an extent that the asset coverage of such borrowing shall be at least 300%.

The Fund may invest at the time of purchase up to 15% of its net assets in securities that are illiquid. If the value of the Fund's holdings of illiquid securities at any time exceeds the percentage limitation applicable at the time of acquisition due to subsequent fluctuations in value or other reasons, the Board will consider what actions, if any, are appropriate to maintain adequate liquidity.

Temporary Defensive Positions

Normally, the Fund invests substantially all of its assets to meet its investment objective. The Fund may invest the remainder of its assets in securities with remaining maturities of less than one year or cash equivalents, or may hold cash. For temporary defensive purposes, including during periods of unusual cash flows, the Fund may depart from its principal investment strategies and invest part or all of its assets in these securities or may hold cash. The Fund may adopt defensive strategies when the Adviser believes securities in which the Fund normally invests have special or unusual risks or are less attractive due to adverse market, economic, political or other conditions.

DISCLOSURE OF PORTFOLIO HOLDINGS

The Board has adopted, on behalf of the Fund, policies and procedures relating to disclosure of the Fund's portfolio securities. These policies and procedures are designed to protect the confidentiality of the Fund's portfolio holdings that are not publicly available ("Confidential Portfolio Holdings") and to prevent the selective disclosure of such information. These policies and procedures may be modified at any time with the approval of the Board.

The holdings of the Fund currently are disclosed in quarterly filings with the Commission on Form N-PORT as of the end of the first and third quarters of the Fund's fiscal year and on Form N-CSR as of the second and fourth quarters of the Fund's fiscal year. In addition, the Fund may disclose to the general public its holdings information from time to time.

The Trust may disclose Confidential Portfolio Holdings to certain persons, including shareholders of the Trust (including shareholders of record of indirect investments in the Fund through another fund managed by the Adviser), qualified potential shareholders as determined by the Adviser (including qualified potential shareholders who are considering an indirect investment in the Fund through another fund managed by the Adviser), and their consultants or agents ("Permitted Recipients"). This information may be made available as soon as the business day following the date to which the information relates.

Except as otherwise noted, to receive Confidential Portfolio Holdings, Permitted Recipients must enter into a confidentiality agreement with the Adviser and the Trust that requires that the Confidential Portfolio Holdings be used solely for purposes determined by senior management of the Adviser to be in the best interest of the shareholders of the Fund.

If the Adviser becomes aware that a recipient has or is likely to violate the terms of a confidentiality agreement regarding Confidential Portfolio Holdings, the Adviser shall cease providing such information to such recipient.

If an employee of the Adviser identifies a potential conflict with respect to the disclosure of Confidential Portfolio Holdings between the interest of the Fund's shareholders, on the one hand, and the Adviser or an affiliated person of the Adviser or the Fund, on the other, the Adviser is required to inform the Trust's Chief Compliance Officer ("CCO") of the potential conflict, and the CCO has the power to decide whether, in light of the circumstances, disclosure should be permitted.

The Trust may also disclose Confidential Portfolio Holdings on a selective basis if the CCO (or an individual designated by the CCO) approves the disclosure and determines that: (i) there is a legitimate business purpose for such disclosure; (ii) recipients are subject to a duty of confidentiality, including a duty not to trade on the nonpublic information; and (iii) the disclosure is in the best interests of Fund shareholders.

Notwithstanding the foregoing, Confidential Portfolio Holdings of the Fund may generally be made available more frequently and prior to its public availability (i) to the Adviser, the Fund's administrator, custodian, principal underwriter and certain other service providers (such as pricing services, proxy voting services, financial printers, pricing information vendors, third parties that deliver analytical, statistical, or consulting services, ratings and rankings agencies and other unaffiliated third parties or their affiliates that provide services and may require Confidential Portfolio Holdings to provide services to the Fund) (collectively, "Service Providers"); (ii) to an accounting firm, an auditing firm or outside legal counsel retained by the Service Providers, their affiliates, or the Fund; (iii) to certain Fund affiliates; (iv) as required by law and (v) to any other party for a legitimate business purpose upon waiver or exception with the approval of the CCO.

The policies and procedures of the Fund provide that none of the Fund, its service providers, the Adviser, or any other party may receive compensation in connection with the disclosure of Confidential Portfolio Holdings.

The Adviser has primary responsibility for ensuring that the Fund's Confidential Portfolio Holdings are disclosed only in accordance with these policies. As part of this responsibility, the Adviser will maintain such internal policies and procedures as it believes are reasonably necessary for preventing the unauthorized disclosure of Confidential Portfolio Holdings.

MANAGEMENT OF THE FUND

Board of Trustees

The business and affairs of the Fund are managed under the oversight of the Board subject to the laws of the State of Delaware and the Trust's Third Amended and Restated Agreement and Declaration of Trust (the "Declaration of Trust"). The Trustees are responsible for oversight of the practices and processes of the Fund and its service providers, rather than active management of the Fund, including in matters relating to risk management. The Trustees seek to understand the key risks facing the Fund, including those involving conflicts of interest; how Fund management identifies and monitors those risks on an ongoing basis; how Fund management develops and implements controls to mitigate those risks; and how Fund management tests the effectiveness of those controls. The Board cannot foresee, know or guard against all risks, nor are the Trustees guarantors against risk. The officers of the Fund conduct and supervise the Fund's daily business operations. Trustees who are not deemed to be "interested persons" of the Fund as defined in the 1940 Act are referred to as "Independent Trustees." Trustees who are deemed to be "interested persons" of the Fund are referred to as "Interested Trustees."

The Board meets as often as necessary to discharge its responsibilities. Currently, the Board conducts regular quarterly meetings, including in-person or telephonic meetings, and holds special in-person or telephonic meetings as necessary to address specific issues that require attention prior to the next regularly scheduled meeting. At these meetings, officers of the Trust provide the Board (or one of its committees) with written and oral reports on regulatory and compliance matters, operational and service provider matters, organizational developments, product proposals, audit results, and insurance and fidelity bond coverage. In addition, it is expected that the Independent Trustees meet at least annually to review, among other things, investment management agreements and certain other plans and agreements and to consider such other matters as they deem appropriate.

The Board has established two standing committees — an Audit Committee and a Valuation Committee – to assist the Board in its oversight of risk as part of its broader oversight of the Fund's affairs. The Committees, both of which are comprised solely of the Board's Independent Trustees, are described below. The Board may establish other committees, or nominate one or more Trustees to examine particular issues related to the Board's oversight responsibilities, from time to time. Each Committee meets periodically to perform its delegated oversight functions and reports its findings and recommendations to the Board.

The Board does not have a lead Independent Trustee. The Board, taking into consideration its oversight responsibility of the Fund, including the Fund's regular use of fair valuation and the Board's extensive experience overseeing the development and implementation of fair valuation processes, believes that its leadership structure is appropriate. In addition, the Board's use of Committees (each of which is chaired by an Independent Trustee with substantial industry experience) and the chair's role as chief executive officer of the Adviser, serve to enhance the Board's understanding of the operations of the Fund and the Adviser.

Board members of the Trust, together with information as to their positions with the Trust, principal occupations and other board memberships, are shown below. Unless otherwise noted, each Trustee has held each principal occupation and board membership indicated for at least the past five years. Each Trustee's mailing address is c/o Stone Ridge Asset Management LLC, 510 Madison Avenue, 21st Floor, New York, NY 10022.

Independent Trustees

Name (Year of Birth)	Position(s) Held with the Trust	Term of Office and Length of Time Served ⁽¹⁾	Principal Occupation(s) During the Past 5 Years	Number of Portfolios in the Fund Complex Overseen by Trustee ⁽²⁾	Other Directorships / Trusteeships Held by Trustee During the Past 5 Years

Daniel Charney (1970)	Trustee	since 2012	Co-President, Cowen and Company, Cowen Inc. (financial services firm) since 2012	51	None.

Interested Trustee

Name (Year of Birth)	Position(s) Held with the Trust	Term of Office and Length of Time Served ⁽¹⁾	Principal Occupation(s) During the Past 5 Years	Number of Portfolios in the Fund Complex Overseen by Trustee ⁽²⁾	Other Directorships / Trusteeships Held by Trustee During the Past 5 Years
Ross Stevens ⁽³⁾ (1969)	Trustee, Chairman	since 2012	Founder and Chief Executive Officer of Stone Ridge since 2012	51	None.

(1) Each Trustee serves until resignation or removal from the Board.

(2) The Fund Complex includes the Trust and Stone Ridge Trust II, Stone Ridge Trust IV, Stone Ridge Trust V, Stone Ridge Trust VI, Stone Ridge Residential Real Estate Income Fund I, Inc., Stone Ridge Longevity Risk Premium Fixed Income Master Trust 2045 and trusts that invest substantially all of their assets in a series of Stone Ridge Longevity Risk Premium Fixed Income Master Trust 2045, other investment companies managed by the Adviser.

(3) Mr. Stevens is an “interested person” of the Trust, as defined in Section 2(a)(19) of the 1940 Act, due to his position with the Adviser.

Additional Information About the Trustees.

Jeffery Ekberg — Through his experience as a senior officer, director and accountant of financial and other organizations, Mr. Ekberg contributes experience overseeing financial and investment organizations to the Board. The Board also benefits from his previous experience as a member of the board of other funds.

Daniel Charney — Through his experience as a senior officer of financial and other organizations, Mr. Charney contributes his experience in the investment management industry to the Board.

Ross Stevens — Through his experience as a senior executive of financial organizations, Mr. Stevens contributes his experience in the investment management industry to the Board.

Additional Information About the Board’s Committees. The Trust has an Audit Committee and a Valuation Committee. The members of both the Audit Committee and the Valuation Committee consist of all the Independent Trustees, namely Messrs. Ekberg and Charney. Mr. Ekberg is the Audit Committee Chair and has been designated as the Audit Committee financial expert. Mr. Charney is the Valuation Committee Chair.

In accordance with its written charter, the Audit Committee’s primary purposes are: (1) to oversee the Trust’s accounting and financial reporting policies and practices, and its internal controls and procedures; (2) to oversee the quality and objectivity of the Trust’s and the Fund’s financial statements and the independent audit thereof;

(3) to oversee the activities of the CCO; (4) to oversee the Trust’s compliance program adopted pursuant to Rule 38a-1 under the 1940 Act, and the Trust’s implementation and enforcement of its compliance policies and procedures thereunder; (5) to oversee the Trust’s compliance with applicable laws in foreign jurisdictions, if any; and (6) to oversee compliance with the Code of Ethics by the Trust and the Adviser.

The Audit Committee reviews the scope of the Fund’s audits, the Fund’s accounting and financial reporting policies and practices and its internal controls. The Audit Committee approves, and recommends to the Independent Trustees for their ratification, the selection, appointment, retention or termination of the Fund’s independent registered public accounting firm and approves the compensation of the independent registered public accounting firm. The Audit Committee also approves all audit and permissible non-audit services provided to the Fund by the independent registered public accounting firm and all permissible non-audit services provided by the Fund’s independent registered public accounting firm to the Adviser and any affiliated service providers if the engagement relates directly to the Fund’s operations and financial reporting. The Audit Committee met five times during the fiscal year ended October 31, 2020.

The Valuation Committee also operates pursuant to a written charter. The duties and powers, to be exercised at such times and in such manner as the Valuation Committee shall deem necessary or appropriate, are as follows: (1) reviewing, from time to time, the Trust’s valuation policy and procedures (the “Valuation Policy”), which Valuation Policy serves to establish policies and procedures for the valuation of the Fund’s assets; (2) making any recommendations to the Trust’s audit committee and/or the Board regarding (i) the functioning of the Valuation Policy, or (ii) the valuation(s) of individual assets; (3) consulting with the Adviser regarding the valuation of the Fund’s assets, including fair valuation determinations of any such assets; (4) periodically reviewing information regarding fair value and other determinations made pursuant to the Trust’s valuation procedures; (5) reporting to the Board on a regular basis regarding the Valuation Committee’s duties; (6) making recommendations in conjunction with the Board’s annual (or other periodical) review of the Trust’s Valuation Policy; (7) periodically reviewing information regarding industry developments in connection with valuation of assets; and (8) performing such other duties as may be assigned to it, from time to time, by the Board. The Valuation Committee met four times during the fiscal year ended October 31, 2020.

Trustee Ownership of the Fund. The following table shows the dollar range of equity securities owned by the Trustees in the Fund and in other investment companies overseen by the Trustee within the same family of investment companies as of December 31, 2020. Investment companies are considered to be in the same family if they share the same investment adviser or principal underwriter and hold themselves out to investors as related companies for purposes of investment and investor services. The information as to ownership of securities which appears below is based on statements furnished to the Fund by its Trustees and executive officers.

	<u>Dollar Range of Equity Securities in the Fund</u>	<u>Aggregate Dollar Range of Equity Securities in All Registered Investment Companies Overseen by Trustee in Family of Investment Companies⁽¹⁾</u>
Independent Trustees		
Jeffery Ekberg	Over \$100,000	Over \$100,000
Daniel Charney	Over \$100,000	Over \$100,000
Interested Trustee		
Ross Stevens ⁽²⁾	Over \$100,000	Over \$100,000

(1) Family of Investment Companies includes the Trust as well as Stone Ridge Trust II, Stone Ridge Trust IV, Stone Ridge Trust V, Stone Ridge Trust VI, Stone Ridge Residential Real Estate Income Fund I, Inc., Stone Ridge Longevity Risk Premium Fixed Income Master Trust 2045 and trusts that invest substantially all of their assets in a series of Stone Ridge Longevity Risk Premium Fixed Income Master Trust 2045, other investment companies managed by the Adviser.

(2) Beneficial ownership through the Adviser’s or its affiliates’ direct Fund investments.

None of the Independent Trustees or their family members beneficially owned any class of securities of the Adviser or principal underwriter of the Fund, or a person (other than a registered investment company) directly or indirectly controlling, controlled by, or under common control with the Adviser or the principal underwriter of the Fund, as of December 31, 2020.

Compensation of Board Members. Each Trustee who is not an employee of the Adviser is compensated by an annual retainer. Each such Trustee's compensation is invested in Stone Ridge funds. The Trust does not pay retirement benefits to its Trustees and officers. The Fund pays a portion of the compensation of the CCO. Other officers and Interested Trustees of the Trust are not compensated by the Fund. The following table sets forth compensation received by the Independent Trustees for the Fund's fiscal year ended October 31, 2020:

<u>Independent Trustees</u>	<u>Aggregate Compensation From the Fund</u>	<u>Total Compensation From the Fund Complex⁽¹⁾ Paid to Trustee</u>
Jeffery Ekberg	\$3,159	\$350,000
Daniel Charney	\$3,159	\$350,000

(1) The Fund Complex includes the Trust and Stone Ridge Trust II, Stone Ridge Trust IV, Stone Ridge Trust V, Stone Ridge Trust VI, Stone Ridge Residential Real Estate Income Fund I, Inc., Stone Ridge Longevity Risk Premium Fixed Income Master Trust 2045 and trusts that invest substantially all of their assets in a series of Stone Ridge Longevity Risk Premium Fixed Income Master Trust 2045, other investment companies managed by the Adviser.

Officers of the Trust

<u>Name (Year of Birth) and Address^{(1) (2)}</u>	<u>Position(s) Held with the Trust</u>	<u>Term of Office and Length of Time Served⁽³⁾</u>	<u>Principal Occupation(s) During Past 5 Years</u>
Ross Stevens (1969)	President, Chief Executive Officer and Principal Executive Officer	since 2012	Founder of Stone Ridge Asset Management LLC, Chief Executive Officer and President of the Adviser, since 2012.
Lauren D. Macioce (1978)	Chief Compliance Officer, Secretary, Chief Legal Officer and Anti-Money Laundering Compliance Officer	since 2016	General Counsel and Chief Compliance Officer of the Adviser, since 2016; prior to that Associate at Ropes & Gray LLP (law firm).
Anthony Zuco (1975)	Treasurer, Principal Financial Officer, Chief Financial Officer and Chief Accounting Officer	since 2018	Supervising Fund Controller at the Adviser, since 2015; prior to that Controller at Owl Creek Asset Management L.P. (investment advisory firm).
Alexander Nyren (1980)	Assistant Secretary	since 2018	Head of Reinsurance of the Adviser, since 2018; member of Reinsurance portfolio management team at the Adviser, since 2013.
David Thomas (1980)	Assistant Treasurer	since 2018	Member of Operations at the Adviser, since 2015; prior to that member of Operations at KCG Holdings, Inc. (financial services firm).
Leson Lee (1975)	Assistant Treasurer	since 2019	Member of Operations at the Adviser, since 2018; prior to that Treasury Manager at Eton Park Capital Management (investment advisory firm).
Domingo Encarnacion (1983)	Assistant Treasurer	since 2020	Tax Manager at the Adviser, since 2016; prior to that Tax Manager at PricewaterhouseCoopers LLP (accounting firm).

(1) Each Officer's mailing address is c/o Stone Ridge Asset Management LLC, 510 Madison Avenue, 21st Floor, New York, NY 10022.

- (2) Each of the Officers is an affiliated person of the Adviser as a result of his or her position with the Adviser.
(3) The term of office of each Officer is indefinite.

Code of Ethics. The Trust and the Adviser have adopted a code of ethics in accordance with Rule 17j-1 under the 1940 Act. This code of ethics permits the personnel of these entities to invest in securities under some circumstances, including securities that the Fund may purchase or hold.

The code of ethics is available on the EDGAR database of the Commission’s website at www.sec.gov. In addition, copies of the code of ethics may be obtained, after mailing the appropriate duplicating fee, by e-mail request to publicinfo@sec.gov.

PROXY VOTING POLICIES AND PROCEDURES

Attached as Appendix B to this SAI is the summary of the guidelines and procedures that the Adviser uses to determine how to vote proxies relating to portfolio securities, including the procedures that the Adviser uses when a vote presents a conflict between the interests of Fund shareholders, on the one hand, and those of the Adviser or any affiliated person of the Fund or the Adviser, on the other. This summary of the guidelines gives a general indication as to how the Adviser will vote proxies relating to portfolio securities on each issue listed. However, the guidelines do not address all potential voting issues or the intricacies that may surround individual proxy votes. For that reason, there may be instances in which votes may vary from the guidelines presented. Notwithstanding the foregoing, the Adviser always endeavors to vote proxies relating to portfolio securities in accordance with the Fund’s investment objective. Information on how the Fund voted proxies relating to portfolio securities during the most recent prior 12-month period ending June 30 is available without charge, (1) upon request, by calling (855) 609-3680, and (2) on the Commission’s website at www.sec.gov.

CONTROL PERSONS AND PRINCIPAL HOLDERS OF SECURITIES

A principal shareholder is any person who owns of record or is known by the Fund to own of record or beneficially 5% or more of any class of the Fund’s outstanding equity securities. A control person is one who owns beneficially, either directly or through controlled companies, more than 25% of the voting securities of the Fund or acknowledges the existence of control. A controlling person possesses the ability to control the outcome of matters submitted for shareholder vote by the Fund.

As of February 17, 2021, (i) no person was known by the Fund to be a control person of the Fund, and (ii) the following persons owned of record or beneficially more than 5% of the outstanding shares of a particular class of the Fund.

Class I Shares

<u>Name and Address</u>	<u>% Ownership of Class</u>	<u>% Ownership of Fund</u>	<u>Parent</u>	<u>Jurisdiction</u>	<u>Type of Ownership⁽¹⁾</u>
National Financial Services, LLC 499 Washington Blvd 4 th Floor Jersey City, NJ 07310	39.71%	37.87%	Fidelity Global Brokerage Group Inc.	DE	Record
Charles Schwab & Co 211 Main St San Francisco, CA 94105	31.23%	34.16%	The Charles Schwab Corporation	DE	Record
TD Ameritrade, Inc. 200 S. 108 th Ave. Omaha, NE 68154	23.94%	22.66%	N/A	N/A	Record

Class M Shares

<u>Name and Address</u>	<u>% Ownership of Class</u>	<u>% Ownership of Fund</u>	<u>Parent</u>	<u>Jurisdiction</u>	<u>Type of Ownership⁽¹⁾</u>
Charles Schwab & Co 211 Main St San Francisco, CA 94105	75.88%	34.16%	The Charles Schwab Corporation	DE	Record
National Financial Services, LLC 200 Liberty St New York, NY 10281	11.70%	37.87%	Fidelity Global Brokerage Group Inc.	DE	Record

(1) "Record Ownership" means the shareholder of record, or the exact name of the shareholder on the account, *i.e.* "ABC Brokerage, Inc." Beneficial ownership refers to the actual pecuniary, or financial, interest in the security, *i.e.* "Jane Doe Shareholder."

As of January 31, 2021, the Trustees and officers of the Trust as a group owned beneficially an aggregate of 80,997.86 shares, or 2.08%, of the outstanding Class I shares of the Fund and less than 1% of the outstanding Class M shares of the Fund.

INVESTMENT ADVISORY AND OTHER SERVICES

The Adviser

Stone Ridge Asset Management LLC is the investment adviser of the Fund. Stone Ridge was organized as a Delaware limited liability company in 2012. The manager of the general partner of the managing member of the Adviser is Ross Stevens.

Stone Ridge serves as the investment adviser of the Fund pursuant to an investment management agreement. The investment management agreement has an initial term of two years from its effective date and continues in effect with respect to the Fund (unless terminated sooner) if its continuance is specifically approved at least annually by the affirmative vote of: (i) a majority of the Independent Trustees, cast in person at a meeting called for the purpose of voting on such approval; and (ii) a majority of the Board or the holders of a majority of the outstanding voting securities of the Fund. The investment management agreement may nevertheless be terminated at any time without penalty, on 60 days' written notice, by the Board, by vote of holders of a majority of the outstanding voting securities of the Fund, or by the Adviser. The investment management agreement terminates automatically in the event of its assignment (as defined in the 1940 Act).

Pursuant to the investment management agreement, the Adviser agrees (i) to make investment decisions and provide a program of continuous investment management for the Fund; prepare, obtain, evaluate and make available to the Fund research and statistical data in connection therewith; obtain and evaluate such information and advice relating to the economy, securities markets and securities as it deems necessary or useful to discharge its duties hereunder; engage in or supervise the selection, acquisition, retention and sale of investments, securities and/or cash; engage in or supervise the selection, acquisition, retention and sale of registered and unregistered investment funds and/or other investment vehicles (the "Investment Funds"); select brokers or dealers to execute transactions; and all of the aforementioned is required to be done in material accordance with the Fund's investment objective, policies and limitations as stated in the Registration Statement and in accordance with guidelines and directions from the Board and any applicable laws and regulations; (ii) subject to the direction and control of the Board, to assist the Fund as it may reasonably request in the conduct of the Fund's business, including oral and written research, analysis, advice, statistical and economic data, judgments regarding individual investments, general economic conditions and trends and long-range investment policies; determine or recommend the securities, instruments, repurchase agreements, options and other investments (including the Investment Funds) and techniques that the Fund will purchase, sell, enter into, use or provide in an ongoing evaluation of the Fund's portfolio; continuously manage and supervise the investment program of the Fund and the composition of its investment portfolio in a manner consistent with the investment objective, policies and

restrictions of the Fund, as set forth in the Registration Statement and as may be adopted from time to time by the Board and applicable laws and regulations; determine or recommend the extent to which the Fund's portfolio shall be invested in securities, Investment Funds and other assets and what portion, if any, should be held uninvested; and undertake to do anything incidental to the foregoing to facilitate the performance of its obligations hereunder; (iii) to furnish to or place at the disposal of the Fund information, evaluations, analyses and opinions formulated or obtained by the Adviser in the discharge of its duties as the Board may, from time to time, reasonably request and maintain or cause to be maintained for the Fund all books, records, reports and any other information required under the 1940 Act, to the extent that such books, records and reports and other information are not maintained or furnished by the custodian, transfer agent, administrator, subadministrator or other agent of the Fund; (iv) to furnish to or place at the disposal of the Fund, such office space, telephone, utilities and facilities as the Fund may require for its reasonable needs and to furnish at the expense of the Adviser, or an affiliate of the Adviser, clerical services related to research, statistical and investment work; (v) to render or make available to the Fund management and administrative assistance in connection with the operation of the Fund that shall include (i) compliance with all reasonable requests of the Board for information, including information required in connection with the Fund's filings with the Commission, other federal and state regulatory organizations and self-regulatory organizations and (ii) such other services as the Adviser shall from time to time determine to be necessary or useful to the administration of the Fund.

The Adviser pays the reasonable salaries, fees and expenses of the Fund's employees and officers (including the Fund's share of any payroll taxes) and any fees and expenses of the Fund's Trustees who are partners, directors, trustees or employees of or otherwise affiliated with the Adviser; however, the Fund bears travel expenses (or an appropriate portion thereof) of Trustees or Fund officers who are partners, directors, trustees or employees of the Adviser to the extent that such expenses relate to attendance at meetings of the Board or any committees thereof or advisers thereto and the Fund bears all or a portion of the expenses related to the Fund's chief compliance officer, as may be approved by the Board from time to time.

The Adviser is not responsible, except to the extent of the reasonable compensation of the Trust's employees who are partners, directors, trustees or employees of the Adviser whose services may be involved, for the following expenses of the Fund: all fees and expenses directly related to portfolio transactions and positions for the Fund's account such as direct and indirect expenses associated with the Fund's investments, including its investments in Investment Funds, and enforcing the Trust's rights in respect of such investments; brokerage commissions; interest and fees on any borrowings by the Fund; professional fees (including expenses of consultants, experts and specialists); research expenses and costs relating to the pricing and return data of Fund assets and related indices; fees and expenses of outside legal counsel (including fees and expenses associated with the review of documentation for prospective investments by the Fund), including foreign legal counsel; accounting, auditing, insurance and tax preparation expenses; fees and expenses in connection with repurchase offers and any repurchases or redemptions of Fund shares of beneficial interest; taxes and governmental fees (including tax preparation fees); fees and expenses of any custodian, subcustodian, transfer agent, registrar and any other agent of the Fund; all costs and charges for equipment or services used in communicating information regarding the Fund's transactions among the Adviser and any custodian or other agent engaged by the Fund; bank services fees; expenses of preparing, printing and distributing copies of offering memoranda and any other sales material (and any supplements or amendments thereto), reports, notices, other communications to shareholders and proxy materials; expenses of preparing, printing and filing reports and other documents with government agencies; expenses of shareholders' meetings; expenses of corporate data processing and related services; shareholder recordkeeping and shareholder account services, fees and disbursements; expenses relating to investor and public relations; and extraordinary expenses such as litigation expenses.

As compensation for its advisory services, the Fund pays the Adviser a fee, computed daily and paid monthly in arrears, at the annual rate of 0.50% of the Fund's average daily net assets.

The Adviser contractually agreed to waive its management fee and/or pay or otherwise bear operating and other expenses of the Fund or a Class thereof (including offering expenses, but excluding brokerage and transactional expenses, borrowing and other investment-related costs and fees including interest and commitment fees, short

dividend expense, acquired fund fees and expenses, taxes, litigation and indemnification expenses, judgments and extraordinary expenses not incurred in the ordinary course of the Fund’s business (collectively, the “Excluded Expenses”) solely to the extent necessary to limit the total annualized expenses, other than Excluded Expenses, of the applicable Class to the percentage specified below of the average daily net assets attributable to such Class.

0.50% for Class I Shares
0.65% for Class M Shares

The Adviser shall be entitled to recoup in later periods expenses attributable to a Class that the Adviser has paid or otherwise borne (whether through reduction of its management fee or otherwise) to the extent that the expenses for the Class of shares (including offering expenses, but excluding Excluded Expenses) after such recoupment do not exceed the lower of (i) the annual expense limitation rate in effect at the time of the actual waiver/reimbursement and (ii) the annual expense limitation rate in effect at the time of the recoupment; *provided*, that the Adviser shall not be permitted to recoup any such fees or expenses beyond three years from the end of the month in which such fee was reduced or such expense was reimbursed.

The Fund paid the following fees to the Adviser during the most recent three fiscal years ended October 31:

	<u>Fiscal year ended October 31, 2018</u>	<u>Fiscal year ended October 31, 2019</u>	<u>Fiscal year ended October 31, 2020</u>
Gross Advisory Fees Accrued	\$3,631,620	\$1,691,341	\$465,860
Fees Waived/Expenses Reimbursed	\$0	\$(1,614)	\$(607,721)
Net Advisory Fees Paid	\$3,631,620	\$1,689,727	\$0

For the fiscal year ended October 31, 2018, the Adviser recouped, pursuant to its expense limitation agreement, advisory fees that it had previously waived and/or expenses that it has previously borne in the amount of \$60,860. For the fiscal year ended October 31, 2019, the Adviser recouped, pursuant to its expense limitation agreement, advisory fees that it had previously waived and/or expenses that it had previously borne in the amount of \$51,209. For the fiscal year ended October 31, 2020, the Adviser did not recoup any advisory fees that it had previously waived and/or expenses that it has previously borne.

Portfolio Managers

Mr. Paul Germain, Mr. Li Song, Mr. Allen Steere and Mr. Ross Stevens are primarily responsible for the day-to-day management of the Fund. The following tables set forth certain additional information with respect to Mr. Germain, Mr. Song, Mr. Steere and Mr. Stevens. The information is as of October 31, 2020, except as otherwise noted.

Other Accounts Managed by the Portfolio Managers

The table below identifies the number of accounts for which Mr. Germain, Mr. Song, Mr. Steere and Mr. Stevens have day-to-day management responsibilities and the total assets in such accounts, within each of the following categories: registered investment companies, other pooled investment vehicles and other accounts.

Portfolio Manager	Registered Investment Companies		Other Pooled Investment Vehicles		Other Accounts	
	Number of Accounts⁽¹⁾	Total Assets (in millions)	Number of Accounts	Total Assets (in millions)	Number of Accounts	Total Assets (in millions)
Paul Germain ⁽²⁾	6	\$6,761	6	\$1,524	3	\$1,438
Li Song	3	\$346	0	\$0	0	\$0
Allen Steere	1	\$59	0	\$0	0	\$0
Ross Stevens ⁽²⁾	5	\$3,928	0	\$0	0	\$0

(1) Includes the Fund.

(2) As of February 1, 2021.

The table below identifies the number of accounts for which Mr. Germain, Mr. Song, Mr. Steere and Mr. Stevens have day-to-day management responsibilities and the total assets in such accounts with respect to which the advisory fee is based on the performance of the account, within each of the following categories: registered investment companies, other pooled investment vehicles and other accounts.

Portfolio Manager	Registered Investment Companies for which the Adviser receives a performance-based fee		Other Pooled Investment Vehicles managed for which the Adviser receives a performance-based fee		Other Accounts managed for which the Adviser receives a performance-based fee	
	Number of Accounts	Total Assets (in millions)	Number of Accounts	Total Assets (in millions)	Number of Accounts	Total Assets (in millions)
Paul Germain ⁽¹⁾	0	\$0	0	\$0	0	\$0
Li Song	0	\$0	0	\$0	0	\$0
Allen Steere	0	\$0	0	\$0	0	\$0
Ross Stevens ⁽¹⁾	0	\$0	0	\$0	0	\$0

(1) As of February 1, 2021.

Potential Conflicts of Interest

Each of the Portfolio Managers is also responsible for managing other accounts in addition to the Fund, including other accounts of the Adviser or its affiliates. Other accounts may include other investment companies registered under the 1940 Act, unregistered investment companies that rely on Section 3(c)(1) or Section 3(c)(7) of the 1940 Act, separately managed accounts, foreign investment companies and accounts or investments owned by the Adviser or its affiliates or the Portfolio Managers. Management of other accounts in addition to the Fund can present certain conflicts of interest, as described below.

From time to time, conflicts of interest arise between a Portfolio Manager's management of the investments of the Fund, on the one hand, and the management of other accounts, on the other. The other accounts might have similar or different investment objectives or strategies as the Fund, or otherwise hold, purchase or sell securities or other assets or instruments that are eligible to be held, purchased or sold by the Fund, or may take positions that are opposite in direction from those taken by the Fund. In addition, investors in, or the owners of, certain accounts managed by the Adviser are also investors in the Adviser or its affiliates and/or have invested assets in accounts managed by the Adviser and for which the Adviser will receive a management fee.

As a fiduciary, the Adviser owes a duty of loyalty to its clients and must treat each client fairly. The Adviser and the Fund have adopted compliance policies and procedures that are designed to avoid, mitigate, monitor and oversee areas that could present potential conflicts of interest.

Allocation of Limited Time and Attention. A Portfolio Manager who is responsible for managing multiple accounts may devote unequal time and attention to the management of those accounts. As a result, the Portfolio Manager may not be able to formulate as complete a strategy or identify equally attractive investment opportunities for each of the accounts as might be the case if he or she were to devote substantially more attention to the management of a single account. The effects of this potential conflict may be more pronounced where accounts overseen by a particular Portfolio Manager have different investment strategies.

Allocation of Investment Opportunities. Conflicts of interest arise as a result of the Adviser's or its affiliates' management of a number of accounts with similar or different investment strategies. When the Adviser or its affiliates purchase or sell securities or other assets or instruments for more than one account, the trades must be allocated in a manner consistent with their fiduciary duties. The Adviser and its affiliates attempt to allocate investments in a fair and equitable manner over time among client accounts, with no account receiving preferential treatment over time. To this end, the Adviser and its affiliates have adopted policies and procedures that are intended to provide the Adviser and its affiliates with flexibility to allocate investments in a manner that is consistent with their fiduciary duties. There is no guarantee, however, that the policies and procedures adopted by the Adviser and its affiliates will be able to detect and/or prevent every situation in which an actual or potential conflict may appear.

An investment opportunity may be suitable for both the Fund and other accounts, but may not be available in sufficient quantities for both the Fund and the other accounts to participate fully. If a Portfolio Manager identifies a limited investment opportunity that may be suitable for multiple accounts, the opportunity may be allocated among these several accounts; as a result of these allocations, there may be instances in which the Fund will not participate in a transaction that is allocated among other accounts or the Fund may not be allocated the full amount of an investment opportunity. Similarly, there may be limited opportunity to sell an investment held by the Fund and another account. In addition, different account guidelines and/or differences within particular investment strategies may lead to the use of different investment practices for accounts with a similar investment strategy. Whenever decisions are made to buy or sell securities or other assets or instruments by the Fund and one or more of the other accounts simultaneously, the Adviser and its affiliates may aggregate the purchases and sales of the securities or other assets or instruments. The Adviser and its affiliates will not necessarily purchase or sell the same securities or other assets or instruments at the same time, in the same direction or in the same proportionate amounts for all eligible accounts, particularly if different accounts have different amounts of capital under management by the Adviser or its affiliates, different amounts of investable cash available, different strategies or different risk tolerances. As a result, although the Adviser and its affiliates may manage different accounts with similar or identical investment objectives, or may manage accounts with different objectives that trade in the same securities or other assets or instruments, the portfolio decisions relating to these accounts, and the performance resulting from such decisions, may differ from account to account, and the trade allocation and aggregation and other policies and procedures of the Fund or the Adviser and its affiliates could have a detrimental effect on the price or amount of the securities or other assets or instruments available to the Fund from time to time. Because the aforementioned considerations may differ between the Fund and other accounts, the investment activities of the Fund and other accounts may differ considerably from time to time.

As a result of regulations governing the ability of certain clients of the Adviser and its affiliates to invest side-by-side, it is possible that the Fund may not be permitted to participate in an investment opportunity at the same time as another fund or another account managed by the Adviser or its affiliates. These limitations may limit the scope of investment opportunities that would otherwise be available to the Fund. The decision as to which accounts may participate in any particular investment opportunity will take into account applicable law and the suitability of the investment opportunity for, and the strategy of, the applicable accounts. It is possible that the Fund may be prevented from participating due to such investment opportunity being more appropriate, in the discretion of the Adviser and its affiliates, for another account.

Conflicts of Interest Among Strategies. At times, a Portfolio Manager may determine that an investment opportunity may be appropriate for only some of the accounts for which he or she exercises investment responsibility, or may decide that certain of the accounts should take differing positions with respect to a particular security or other asset or instrument. In these cases, the Portfolio Manager may place separate transactions for one or more accounts, which may affect the market price of the security or other asset or instrument or the execution of the transaction, or both, to the detriment or benefit of one or more other accounts. Similarly, the Adviser or its affiliates may take positions in accounts or investments owned by them that are similar to or different from those taken by one or more client accounts.

Conflicts may also arise in cases when accounts invest in different parts of an issuer's capital structure, including circumstances in which one or more accounts own private securities or obligations of an issuer and other accounts may own public securities of the same issuer. Actions by investors in one part of the capital structure could disadvantage investors in another part of the capital structure. In addition, purchases or sales of the same investment may be made for two or more accounts on the same date. There can be no assurance that an account will not receive less (or more) of a certain investment than it would otherwise receive if this conflict of interest among accounts did not exist. In effecting transactions, it may not be possible, or consistent with the investment objectives of accounts, to purchase or sell securities or other assets or instruments at the same time or at the same prices.

Selection of Service Providers. The Adviser or its affiliates may be able to select or influence the selection of service providers to clients, including the brokers and dealers that are used to execute securities or other

transactions for the accounts that they supervise. In addition to executing trades, some brokers and dealers may provide the Adviser or its affiliates with brokerage and research services (as those terms are defined in Section 28(e) of the Securities Exchange Act of 1934, as amended (the “Exchange Act”)), which may result in the payment of higher brokerage fees than might have otherwise been available. These services may be more beneficial to certain accounts than to others. In addition, the Adviser or its affiliates have received and may receive loans or other services from service providers to clients. Although such services are negotiated at arm’s length, they pose conflicts of interest to the Adviser or its affiliates in selecting such service providers.

Related Business Opportunities. The Adviser or its affiliates may provide more services (such as distribution or recordkeeping) for some types of accounts than for others. In such cases, a Portfolio Manager may benefit, either directly or indirectly, by devoting disproportionate attention to the management of accounts that provide greater overall returns to the Adviser and its affiliates.

Broad and Wide-Ranging Activities. The Adviser and its related parties engage in a broad spectrum of activities and may expand the range of services that they provide over time. The Adviser and its related parties will generally not be restricted in the scope of their business or in the performance of any such services (whether now offered or undertaken in the future), even if such activities could give rise to conflicts of interest, and whether or not such conflicts are described herein. In the ordinary course of their business activities, including activities with third-party service providers, lenders and/or counterparties, the Adviser and its related parties engage in activities where the interests of the Adviser and its related parties or the interests of their clients conflict with the interests of the shareholders of the Fund. Certain employees of the Adviser, including certain Portfolio Managers, also have responsibilities relating to the business of one or more related parties. These employees are not restricted in the amount of time that may be allocated to the business activities of the Adviser’s related parties, and the allocation of such employees’ time between the Adviser and its related parties may change over time.

Variation in Compensation. A conflict of interest arises where the financial or other benefits available to the Adviser differ among the accounts that it manages. The structure of the Adviser’s management fee differs among accounts (such as where certain accounts pay higher management fees or a performance or incentive fee), which means the Adviser might be motivated to help certain accounts over others. In addition, a Portfolio Manager or the Adviser might be motivated to favor accounts in which such Portfolio Manager has an interest or in which the Adviser and/or its affiliates have interests. Similarly, the desire to maintain or raise assets under management or to enhance the Adviser’s performance record or to derive other rewards, financial or otherwise, could influence the Adviser to lend preferential treatment to those accounts that could most significantly benefit the Adviser.

Investments in the Fund by the Adviser. The Adviser or its affiliates purchase shares from the Fund from time to time, and may hold a material position in the Fund. The Adviser or its affiliates face conflicting interests in determining whether, when and in what amount to redeem Fund shares. If the Adviser or its affiliate redeems a significant amount of Fund shares, this may adversely affect the Fund’s performance to the extent that the Fund is required to sell investments when it would not otherwise do so.

Investments by Adviser or Related Entities. The Adviser or a related entity may invest in entities that may provide financial or other services for the Fund.

Certain Potential Conflicts Relating to Expenses. The allocation of fees and expenses among the Fund and other funds or accounts advised by the Adviser will often require the Adviser to exercise its of discretion to select an allocation method it determines to be appropriate in light of the particular facts and circumstances. The Adviser will be subject to conflicts of interest in making such determinations, and there can be no assurance that any allocations (i) will reflect an entity’s *pro rata* share of such expenses based on the amounts invested (or anticipated to be invested) and/or the market value of the investment held (or anticipated to be held) by each fund advised by the Adviser, or (ii) will be in proportion to the number of participating funds advised by the Adviser or the proportion of time spent on each such fund. Similarly, the determination of whether an expense (for instance, the fees and expenses of service providers who work on Fund-related matters) is appropriately borne by

the Fund (or a specific class of shares) or the Adviser often cannot be resolved by reference to a pre-existing formula and will require the exercise of discretion, and the Adviser will be subject to conflicts of interest in making such determinations.

Portfolio Manager Compensation

Portfolio Managers receive a base salary and may also receive a bonus. Compensation of a Portfolio Manager is determined at the discretion of the Adviser and may be deferred. It may be based on a number of factors including the Portfolio Manager’s experience, responsibilities, the perception of the quality of his or her work efforts, and the consistency with which he or she demonstrates kindness to other employees, trading counterparties, vendors and clients. As a firm focused on beta, the compensation of Portfolio Managers is not based upon the performance of client accounts that the Portfolio Manager manage. The Adviser reviews the compensation of each Portfolio Manager at least annually.

Portfolio Manager Securities Ownership

As of October 31, 2020 (except as otherwise noted), the Portfolio Managers beneficially owned the following shares of the Fund:

<u>Portfolio Manager</u>	<u>Dollar Range of Shares Beneficially Owned</u>
Paul Germain ⁽¹⁾	\$50,001 - 100,000
Li Song	\$10,001 - 50,000
Allen Steere	\$10,001 - 50,000
Ross Stevens ⁽¹⁾⁽²⁾	\$100,001 - \$500,000

(1) As of February 1, 2021.

(2) Beneficial ownership through the Adviser’s or its affiliates’ investments in the Fund.

Principal Underwriter

Subject to the conditions described in the “Shareholder Information” section of the Prospectus, shares of the Fund are offered on a continuous basis through ALPS Distributors, Inc. (the “Distributor”), located at 1290 Broadway, Suite 1000, Denver, Colorado 80203, as distributor pursuant to a distribution agreement (the “Distribution Agreement”) between the Distributor and the Trust, on behalf of the Fund. Pursuant to the Distribution Agreement, the Distributor shall devote its best efforts to effect sales of shares of the Fund but shall not be obligated to sell any certain number of shares. The Distributor receives no compensation from the Fund for distribution of the Fund’s shares.

Distribution Plans Pursuant to Rule 12b-1

The Fund has adopted Rule 12b-1 plans for its Class M shares (the “Class M 12b-1 Plan”) and for its Class I shares (the “Class I 12b-1 Plan” and collectively the “12b-1 Plans”). The Class M 12b-1 Plan, among other things, permits the Class M share class of the Fund to pay Rule 12b-1 fees to financial intermediaries through the Distributor at annual rates not exceeding 0.15% of the average daily net assets of the Class M share class of the Fund, such fee to be calculated and accrued daily and paid monthly. No fees are charged pursuant to the Class I 12b-1 Plan. Pursuant to Rule 12b-1 under the 1940 Act, the 12b-1 Plans (together with the Distribution Agreement) were approved by the Board, including a majority of the Trustees who are not interested persons of the Fund (as defined in the 1940 Act) and who have no direct or indirect financial interest in the operations of the 12b-1 Plans or the Distribution Agreement. Each 12b-1 Plan is intended to benefit the class of shares to which it relates by providing additional ongoing shareholder services to such class’s shareholders.

The Fund’s Class M shares incurred \$9,849 in 12b-1 fees during the fiscal year ended October 31, 2020.

The table below reflects the amounts the Fund’s Class M shares paid for the principal types of activities under its Class M 12b-1 Plan during the fiscal year ended October 31, 2020.

Advertising/Marketing	\$ 0
Printing/Postage	\$ 0
Payment to distributor	\$ 0
Payment to dealers	\$5,403
Compensation to sales personnel	\$4,446
Other	\$ 0
Total	<u>\$9,849</u>

The Class M 12b-1 Plan and the Class I 12b-1 Plan may be terminated by vote of a majority of the Independent Trustees, or by vote of a majority of the outstanding voting securities of the Class M shares and the Class I shares, respectively, of the Fund. The 12b-1 Plans may be amended by a vote of the Board, including a majority of the Independent Trustees, cast in person at a meeting called for that purpose. Any change in the Class M 12b-1 Plan or the Class I 12b-1 Plan that would materially increase the fees payable thereunder by the Class M shares or Class I shares, respectively, of the Fund requires approval by a vote of the holders of a majority of such shares outstanding. The Board reviews quarterly a written report detailing the costs that have been incurred.

The 12b-1 Plans will continue in effect for successive one-year periods; *provided* that each such continuance is specifically approved (i) by the vote of a majority of the Independent Trustees and (ii) by the vote of a majority of the entire Board cast in person at a meeting called for that purpose or by a vote of a majority of the outstanding securities of the relevant class.

No Independent Trustee has any direct or indirect financial interest in the operation of the 12b-1 Plans. Except as disclosed in the Prospectus, no interested person of the Fund has any direct or indirect financial interest in the operation of the 12b-1 Plans except to the extent that the Distributor, the Adviser or certain of their employees may be deemed to have such an interest as a result of benefits derived from the successful operation of the 12b-1 Plans.

Other Service Providers

Administrator. The Trust has entered into an administration agreement with U.S. Bancorp Fund Services, LLC, doing business as U.S. Bank Global Fund Services (the “Administrator”) pursuant to which the Administrator provides administrative services to the Fund. The Administrator is responsible for (i) the general administrative duties associated with the day-to-day operations of the Fund; (ii) conducting relations with the custodian, independent registered public accounting firm, legal counsel and other service providers; (iii) providing regulatory reporting; and (iv) providing necessary office space, equipment, personnel, compensation and facilities for handling the affairs of the Fund. In performing its duties and obligations under the administration agreement, the Administrator shall not be held liable except for a loss arising out of the Administrator’s refusal or failure to comply with the terms of the administration agreement or from its bad faith, negligence or willful misconduct in the performance of its duties under the administration agreement.

U.S. Bank Global Fund Services also serves as fund accountant to the Fund under a separate agreement with the Trust and is responsible for calculating the Fund’s total NAV, total net income and NAV per share of the Fund on a daily basis.

The Fund paid the following administration and fund accounting fees to the Administrator during the most recent three fiscal years ended October 31.

<u>Fiscal Year Ended October 31, 2018</u>	<u>Fiscal Year Ended October 31, 2019</u>	<u>Fiscal Year Ended October 31, 2020</u>
\$119,844	\$47,760	\$67,463

Transfer Agent/Dividend Disbursing Agent. U.S. Bancorp Fund Services, LLC, doing business as U.S. Bank Global Fund Services (the “Transfer Agent”), is the transfer agent for the Fund’s shares and the dividend disbursing agent for payment of dividends and distributions on Fund shares. The principal business address of the Transfer Agent is 615 East Michigan Street, Milwaukee, Wisconsin 53202.

Custodian. U.S. Bank NA (the “Custodian”), located at 1555 N. River Center Drive, Suite 302, Milwaukee, Wisconsin 53212, serves as the custodian for the Fund. As such, the Custodian holds in safekeeping certificated securities and cash belonging to the Fund and, in such capacity, is the registered owner of securities in book-entry form belonging to the Fund. Upon instruction, the Custodian receives and delivers cash and securities of the Fund in connection with Fund transactions and collects all dividends and other distributions made with respect to portfolio securities of the Fund. The Custodian also maintains certain accounts and records of the Fund.

Independent Registered Public Accounting Firm. Ernst & Young LLP serves as the Fund’s independent registered public accountant. Ernst & Young LLP provides audit services and assistance and consultation in connection with the review of Commission filings and certain tax compliance services. Ernst & Young, LLP is located at 220 South 6th Street, Minneapolis, Minnesota 55402.

Counsel. Ropes & Gray LLP serves as counsel to the Fund, and is located at 800 Boylston Street, Boston, Massachusetts 02199.

TAX STATUS

The following discussion of U.S. federal income tax consequences of investment in the Fund is based on the Internal Revenue Code of 1986, as amended (the “Code”), U.S. Treasury regulations and other applicable authority, as of the date of the preparation of this SAI. These authorities are subject to change by legislative or administrative action, possibly with retroactive effect. The following discussion is only a summary of some of the important U.S. federal income tax considerations generally applicable to investments in the Fund and does not address all aspects of taxation that may apply to shareholders or to particular shareholders. Shareholders should consult their own tax advisers regarding their particular situation and the possible application of federal, state, local or non-U.S. tax laws.

Taxation of the Fund

The Fund has elected to be treated and intends to qualify and be treated each year as a regulated investment company under Subchapter M of the Code (a “RIC”). In order to qualify for the special tax treatment accorded regulated investment companies and their shareholders, the Fund generally must, among other things:

- (a) derive at least 90% of its gross income for each taxable year from (i) dividends, interest, payments with respect to certain securities loans and gains from the sale or other disposition of stock, securities or foreign currencies or other income (including but not limited to gains from options, futures or forward contracts) derived with respect to its business of investing in such stock, securities or currencies and (ii) net income derived from interests in “qualified publicly traded partnerships” (as defined below);
- (b) diversify its holdings so that, at the end of each quarter of the Fund’s taxable year, (i) at least 50% of the value of the Fund’s total assets is represented by cash and cash items, U.S. government securities, securities of other regulated investment companies and other securities limited in respect of any one issuer to a value not greater than 5% of the value of the Fund’s total assets and not more than 10% of the outstanding voting securities of such issuer, and (ii) not more than 25% of the value of the Fund’s total assets is invested, including through corporations in which the Fund owns a 20% or more voting stock interest, (x) in the securities (other than those of the U.S. government or other regulated investment companies) of any one issuer or of two or more issuers that the Fund controls and that are engaged in the same, similar or related trades or businesses, or (y) in the securities of one or more qualified publicly traded partnerships (as defined below); and

- (c) distribute with respect to each taxable year at least 90% of the sum of its investment company taxable income (as that term is defined in the Code without regard to the deduction for dividends paid — generally taxable ordinary income and the excess, if any, of net short-term capital gains over net long-term capital losses) and any net tax-exempt interest income for such year.

In general, for purposes of the 90% gross income requirement described in paragraph (a) above, income derived from a partnership will be treated as qualifying income only to the extent such income is attributable to items of income of the partnership that would be qualifying income if realized directly by the regulated investment company. However, 100% of the net income derived from an interest in a “qualified publicly traded partnership” (a partnership (x) the interests in which are traded on an established securities market or are readily tradable on a secondary market or the substantial equivalent thereof, and (y) that derives less than 90% of its income from the qualifying income described in paragraph (a)(i) above) will be treated as qualifying income. In general, such entities will be treated as partnerships for federal income tax purposes because they meet the passive income requirement under Code section 7704(c)(2). In addition, although in general the passive loss rules of the Code do not apply to regulated investment companies, such rules do apply to a regulated investment company with respect to items attributable to an interest in a qualified publicly traded partnership.

For purposes of the diversification test in (b) above, the term “outstanding voting securities of such issuer” will include the equity securities of a qualified publicly traded partnership. Also, for purposes of the diversification test in (b) above, the identification of the issuer (or, in some cases, issuers) of a particular investment can depend on the terms and conditions of that investment. In some cases, identification of the issuer (or issuers) is uncertain under current law, and an adverse determination or future guidance by the Internal Revenue Service (“IRS”) with respect to issuer identification for a particular type of investment may adversely affect the Fund’s ability to meet the diversification test in (b) above. In addition, if the Fund were to own 20% or more of the voting interests of a corporation, the Fund would be required to “look through” such corporation to its holdings and combine the appropriate percentage of such corporation’s assets with the Fund’s assets for purposes of satisfying the 25% diversification test described in (b)(ii) above.

The Fund’s investment strategies will potentially be limited by its intention to qualify for treatment as regulated investment companies. The tax treatment of certain of the Fund’s investments under one or more of the qualification or distribution tests applicable to RICs is not certain. An adverse determination or future guidance by the IRS or a change in law might affect the Fund’s ability to qualify for such treatment.

If the Fund qualifies as a regulated investment company that is accorded special tax treatment, the Fund generally will not be subject to U.S. federal income tax on income distributed in a timely manner to its shareholders in the form of dividends (including Capital Gain Dividends, as defined below). If the Fund were to fail to meet the income, diversification or distribution tests described above, the Fund could in some cases cure such failure, including by paying the Fund-level tax, paying interest, making additional distributions or disposing of certain assets. If the Fund were ineligible to or otherwise did not cure such failure for any year, or if the Fund were otherwise to fail to qualify as a regulated investment company accorded special tax treatment for such year, the Fund would be subject to tax on its taxable income at corporate rates, and all distributions from earnings and profits, including any distributions of net tax-exempt income and net long-term capital gains, would be taxable to shareholders as ordinary income. Some portions of such distributions could be eligible for the dividends-received deduction in the case of corporate shareholders and may be eligible to be treated as “qualified dividend income” in the case of shareholders taxed as individuals, provided, in both cases, that the shareholder meets certain holding period and other requirements in respect of the Fund’s shares (as described below). In addition, the Fund could be required to recognize unrealized gains, pay substantial taxes and interest and make substantial distributions before re-qualifying as a regulated investment company that is accorded special tax treatment.

The Fund intends to distribute to its shareholders, at least annually, substantially all of its investment company taxable income (computed without regard to the dividends-paid deduction), its net tax-exempt income, if any, and any net capital gain. Investment company taxable income that is retained by the Fund will be subject to tax at regular corporate rates. The Fund may also retain for investment its net capital gain. If the Fund retains any net

capital gain, it will be subject to tax at regular corporate rates on the amount retained, but it may designate the retained amount as undistributed capital gains in a notice mailed within 60 days of the close of the Fund's taxable year to its shareholders who, in turn, (i) will be required to include in income for U.S. federal income tax purposes, as long-term capital gain, their shares of such undistributed amount, and (ii) will be entitled to credit their proportionate shares of the tax paid by the Fund on such undistributed amount against their U.S. federal income tax liabilities, if any, and to claim refunds on a properly-filed U.S. tax return to the extent the credit exceeds such liabilities. If the Fund makes this designation, for U.S. federal income tax purposes, the tax basis of shares owned by a shareholder of the Fund will be increased by an amount equal under current law to the difference between the amount of undistributed capital gains included in the shareholder's gross income under clause (i) of the preceding sentence and the tax deemed paid by the shareholder under clause (ii) of the preceding sentence. The Fund is not required to, and there can be no assurance that the Fund will, make this designation if it retains all or a portion of its net capital gain in a taxable year.

In determining its net capital gain, including in connection with determining the amount available to support a Capital Gain Dividend, its taxable income and its earnings and profits, a RIC generally may elect to treat part or all of any post-October capital loss (defined as any net capital loss attributable to the portion, if any, of the taxable year after October 31, or, if there is no such loss, the net long-term capital loss or net short-term capital loss attributable to any such portion of the taxable year), or late-year ordinary loss (generally, the sum of (i) net ordinary loss from the sale, exchange or other taxable disposition of property attributable to the portion, if any, of the taxable year after October 31, and its (ii) other net ordinary loss attributable to the portion, if any, of the taxable year after December 31) as if incurred in the succeeding taxable year.

If the Fund fails to distribute in a calendar year at least an amount equal to the sum of 98% of its ordinary income for such year and 98.2% of its capital gain net income for the one-year period ending on October 31 of such year, plus any retained amount for the prior year, the Fund will be subject to a nondeductible 4% excise tax on the undistributed amounts. For these purposes, ordinary gains and losses from the sale, exchange or other taxable disposition of property that would be properly taken into account after October 31 are treated as arising on January 1 of the following calendar year. For purposes of the excise tax, the Fund will be treated as having distributed any amount on which it has been subject to corporate income tax in the taxable year ending within the calendar year. A dividend paid to shareholders in January of a year generally is deemed to have been paid on December 31 of the preceding year, if the dividend is declared and payable to shareholders of record on a date in October, November or December of that preceding year. The Fund intends generally to make distributions sufficient to avoid imposition of the 4% excise tax, although there can be no assurance that it will be able to do so.

Fund Distributions

Shareholders subject to U.S. federal income tax will be subject to tax on dividends received from the Fund, regardless of whether received in cash or reinvested in additional shares. Such distributions generally will be taxable to shareholders in the calendar year in which the distributions are received, except that a dividend declared and payable to shareholders of record in October, November or December and paid to shareholders the following January generally is deemed to have been paid by the Fund on the preceding December 31. Distributions received by tax-exempt shareholders generally will not be subject to U.S. federal income tax to the extent permitted under applicable tax law.

For U.S. federal income tax purposes, distributions of investment income generally are taxable to shareholders as ordinary income. Taxes to shareholders on distributions of capital gains are determined by how long the Fund owned (and is treated for U.S. federal income tax purposes as having owned) the investments that generated them, rather than how long a shareholder has owned his or her shares. In general, the Fund will recognize long-term capital gain or loss on investments it has owned (or is deemed to have owned) for more than one year, and short-term capital gain or loss on investments it has owned (or is deemed to have owned) for one year or less. Tax rules can alter the Fund's holding period in investments and thereby affect the tax treatment of gain or loss on such investments. Distributions of net capital gain (that is, the excess of net long-term capital gain over net

short-term capital loss, in each case determined with reference to any loss carryforwards) that are properly reported by the Fund as capital gain dividends (“Capital Gain Dividends”) generally will be taxable to shareholders as long-term capital gains includible in net capital gain and taxed to individuals at reduced rates relative to ordinary income. Distributions of net short-term capital gain (as reduced by any long-term capital loss for the taxable year) will be taxable to shareholders as ordinary income, and shareholders will not be able to offset distributions of the Fund’s net short-term capital gains with capital losses that they recognize with respect to their other investments. As required by federal law, detailed federal tax information with respect to each calendar year will be furnished to each shareholder early in the succeeding year. The IRS and the Department of the Treasury have issued regulations that impose special rules in respect of Capital Gain Dividends received through partnership interests constituting “applicable partnership interests” under Section 1061 of the Code.

The ultimate tax characterization of the Fund’s distributions made in a taxable year cannot finally be determined until after the end of that taxable year. The Fund may make total distributions during a taxable year in an amount that exceeds the Fund’s “current and accumulated earnings and profits” (generally, the net investment income and net capital gains of the Fund with respect to that year), in which case the excess generally will be treated as a return of capital, which will be tax-free to the holders of the shares, up to the amount of the shareholder’s tax basis in the applicable shares, with any amounts exceeding such basis treated as gain from the sale of such shares.

Capital losses in excess of capital gains (“net capital losses”) are not permitted to be deducted against the Fund’s net investment income. Instead, potentially subject to certain limitations, the Fund may carry net capital losses from any taxable year forward to subsequent taxable years without expiration to offset capital gains, if any, realized during such subsequent taxable years. The Fund’s capital loss carryforwards are reduced to the extent they offset the Fund’s current-year net realized capital gains, whether the Fund retains or distributes such gains. The Fund must apply such carryforwards first against gains of the same character. The Fund’s available capital loss carryforwards, if any, will be set forth in its annual shareholder report for each fiscal year.

“Qualified dividend income” received by an individual will be taxed at the rates applicable to long-term capital gain. In order for some portion of the dividends received by the Fund shareholder to be qualified dividend income, the Fund must meet holding period and other requirements with respect to some portion of the dividend-paying stocks in its portfolio and the shareholder must meet holding period and other requirements with respect to the Fund’s shares. In general, a dividend will not be treated as qualified dividend income (at either the Fund or shareholder level) (1) if the dividend is received with respect to any share of stock held for fewer than 61 days during the 121-day period beginning on the date that is 60 days before the date on which such share becomes ex-dividend with respect to such dividend (or, in the case of certain preferred stock, 91 days during the 181-day period beginning 90 days before such date), (2) to the extent that the recipient is under an obligation (whether pursuant to a short sale or otherwise) to make related payments with respect to positions in substantially similar or related property, (3) if the recipient elects to have the dividend income treated as investment income for purposes of the limitation on deductibility of investment interest, or (4) if the dividend is received from a foreign corporation that is (a) not eligible for the benefits of a comprehensive income tax treaty with the United States (with the exception of dividends paid on stock of such a foreign corporation readily tradable on an established securities market in the United States) or (b) treated as a PFIC (as defined below).

In general, distributions of investment income reported by the Fund as derived from qualified dividend income will be treated as qualified dividend income by a shareholder taxed as an individual, provided both the shareholder and the Fund meet the holding period and other requirements described above. If the aggregate qualified dividends received by the Fund during any taxable year are 95% or more of its gross income (excluding net long-term capital gain over net short-term capital loss), then 100% of the Fund’s dividends (other than Capital Gain Dividends) will be eligible to be treated as qualified dividend income. It is unclear whether or to what extent distributions from the Fund will constitute qualified dividend income.

If the Fund receives dividends from an Underlying Fund or another fund such as an ETF that qualifies as a regulated investment company (each, an “Underlying RIC”), and the Underlying RIC reports such dividends as

qualified dividend income, then the Fund is permitted in turn to report a portion of its distributions as qualified dividend income, provided the Fund meets holding period and other requirements with respect to shares of the Underlying RIC.

In general, dividends of net investment income received by corporate shareholders of the Fund will qualify for the dividends-received deduction generally available to corporations to the extent of the amount of eligible dividends received by the Fund from domestic corporations for the taxable year. A dividend received by the Fund will not be treated as a dividend eligible for the dividends-received deduction (1) if it has been received with respect to any share of stock that the Fund has held for less than 46 days (91 days in the case of certain preferred stock) during the 91-day period beginning on the date which is 45 days before the date on which such share becomes ex-dividend with respect to such dividend (during the 181-day period beginning 90 days before such date in the case of certain preferred stock) or (2) to the extent that the Fund is under an obligation (pursuant to a short sale or otherwise) to make related payments with respect to positions in substantially similar or related property. Moreover, the dividends-received deduction may otherwise be disallowed or reduced (1) if the corporate shareholder fails to satisfy the foregoing requirements with respect to its shares of the Fund or (2) by application of various provisions of the Code (for instance, the dividends-received deduction is reduced in the case of a dividend received on debt-financed portfolio stock (generally, stock acquired with borrowed funds)). It is unclear whether or to what extent distributions from the Fund will qualify for the dividends-received deduction.

If the Fund receives dividends from an Underlying RIC, and the Underlying RIC reports such dividends as eligible for the dividends-received deduction, then the Fund is permitted in turn to report its distributions derived from those dividends as eligible for the dividends-received deduction as well, provided the Fund meets holding period and other requirements with respect to shares of the Underlying RIC.

Any distribution of income that is attributable to (i) income received by the Fund in lieu of dividends with respect to securities on loan pursuant to a securities lending transaction or (ii) dividend income received by the Fund on securities it temporarily purchased from a counterparty pursuant to a repurchase agreement that is treated for U.S. federal income tax purposes as a loan by the Fund will not constitute qualified dividend income to individual shareholders and will not be eligible for the dividends-received deduction for corporate shareholders.

Pursuant to proposed regulations on which RICs may rely, distributions by a RIC to its shareholders that the RIC properly reports as “section 199A dividends,” as defined and subject to certain conditions described below, are treated as qualified REIT dividends in the hands of non-corporate shareholders. Non-corporate shareholders are permitted a federal income tax deduction equal to 20% of qualified REIT dividends received by them, subject to certain limitations. Very generally, a “section 199A dividend” is any dividend or portion thereof that is attributable to certain dividends received by the RIC from REITs, to the extent such dividends are properly reported as such by the RIC in a written notice to its shareholders. A section 199A dividend is treated as a qualified REIT dividend only if the shareholder receiving such dividend holds the dividend-paying RIC shares for at least 46 days of the 91-day period beginning 45 days before the shares become ex-dividend, and is not under an obligation to make related payments with respect to a position in substantially similar or related property. A RIC is permitted to report such part of its dividends as section 199A dividends as are eligible, but is not required to do so.

The Code generally imposes a 3.8% Medicare contribution tax on the net investment income of certain individuals, trusts and estates to the extent their income exceeds certain threshold amounts. For these purposes, “net investment income” generally includes, among other things, (i) distributions paid by the Fund of net investment income and capital gains as described above, and (ii) any net gain from the sale, redemption or exchange of Fund shares. Shareholders are advised to consult their tax advisers regarding the possible implications of this additional tax on their investment in the Fund.

Dividends and distributions on shares of the Fund are generally subject to U.S. federal income tax as described herein to the extent they do not exceed the Fund’s current and accumulated earnings and profits, even though

such dividends and distributions may economically represent a return of a particular shareholder's investment. Such distributions are likely to occur in respect of shares purchased at a time when the net asset value of the Fund reflects either unrealized gains, or realized undistributed income or gains, which were therefore included in the price the shareholder paid. The Fund may be required to distribute realized income or gains regardless of whether its net asset value also reflects unrealized losses. Such distributions may reduce the fair market value of the Fund's shares below the shareholder's cost basis in those shares.

Sale, Exchange or Redemption of Shares

The sale, exchange or redemption of shares of the Fund will generally give rise to a gain or loss. In general, any gain or loss realized upon a taxable disposition of shares will be treated as long-term capital gain or loss if the shareholder has held the shares for more than 12 months. Otherwise, the gain or loss on a taxable disposition of Fund shares will generally be treated as short-term capital gain or loss. However, any loss realized upon a taxable disposition of shares held for six months or less will be treated as long-term, rather than short-term, to the extent of any Capital Gain Dividends received (or deemed received) by the shareholder with respect to the shares. All or a portion of any loss realized upon a taxable disposition of shares will be disallowed under the Code's "wash-sale" rule if other substantially identical shares of the Fund are purchased within 30 days before or after the disposition. In such a case, the basis of the newly purchased shares will be adjusted to reflect the disallowed loss.

If the Fund were to be deemed a "nonpublicly offered" RIC as described in "Expenses Subject to Special Pass-Through Rules" below, depending on a shareholder's percentage ownership in that Fund, a shareholder's partial redemption of Fund shares could cause the shareholder to be treated as having received a distribution under Section 301 of the Code ("Section 301 distribution") unless the redemption is treated as being either (i) "substantially disproportionate" with respect to such shareholder or (ii) otherwise "not essentially equivalent to a dividend" under the relevant rules of the Code. A Section 301 distribution is not treated as a sale or exchange giving rise to capital gain or loss, but rather is treated as a dividend to the extent supported by the Fund's current and accumulated earnings and profits, with the excess treated as a return of capital reducing the shareholder's tax basis in its Fund shares, and thereafter as capital gain. Where a redeeming shareholder is treated as receiving a dividend, there is a risk that other shareholders of the Fund whose percentage interests in the Fund increase as a result of such redemption will be treated as having received a taxable distribution from the Fund.

Upon the sale, exchange or redemption of Fund shares, the Fund or, in the case of shares purchased through a financial intermediary, the financial intermediary, may be required to provide you and the IRS with cost basis and certain other related tax information about the Fund shares you sold, exchanged or redeemed. See "Tax Basis Information" below for more information.

Options, Futures, Forward Contracts, Swap Agreements, Hedges, Straddles and Other Transactions

Due to the Fund's options strategies, a substantial portion of the Fund's income could consist of short-term capital gains, taxable to shareholders as ordinary income when distributed to them; such income will not constitute qualified dividend income or qualify for the dividends-received deduction.

In general, option premiums received by the Fund are not immediately included in the income of the Fund. Instead, the premiums are recognized (i) when the option contract expires, (ii) the option is exercised by the holder or (iii) the Fund transfers or otherwise terminates the option (e.g., through a closing transaction). If securities are purchased by the Fund pursuant to the exercise of a put option written by it, the Fund generally will subtract the premium received for purposes of computing its cost basis in the securities purchased. In either case, provided the tax treatment of an option transaction is not governed by Section 1256 of the Code (discussed further below), gain or loss arising in respect of a termination of the Fund's obligation under the option other than through the exercise of the option will be short-term gain or loss depending on whether the premium income received by the Fund is greater or less than the amount paid by the Fund (if any) in terminating the transaction. Thus, for example, if an option written by the Fund on a single stock expires unexercised, the Fund generally will recognize short-term gain equal to the premium received.

It is possible that certain of the Fund's options transactions, such as certain listed "non-equity options" as defined in Section 1256 of the Code — which include certain options written on equity indices — will be governed by Section 1256 of the Code. Such options, together with regulated futures contracts, are referred to as "section 1256 contracts." Gains or losses on section 1256 contracts generally are considered 60% long-term and 40% short-term capital gains or losses ("60/40"), although certain foreign currency gains and losses from such contracts may be treated as ordinary in character. Also, section 1256 contracts held by the Fund at the end of each taxable year (and, for purposes of the 4% excise tax, on certain other dates as prescribed under the Code) are "marked to market" with the result that unrealized gains or losses are treated as though they were realized and the resulting gain or loss is treated as ordinary or 60/40 gain or loss, as applicable.

In addition to the special rules described above in respect of futures and options transactions, the Fund's transactions in other derivative instruments (e.g., forward contracts and swap agreements), foreign currencies and any of its other hedging, short sale, securities loan or similar transactions, may be subject to one or more special tax rules (including mark-to-market, constructive sale, notional principal contract, straddle, wash sale and short sale rules). These rules may affect whether gains and losses recognized by the Fund are treated as ordinary or capital or as short-term or long-term, accelerate the recognition of income or gains to the Fund, defer losses to the Fund and cause adjustments in the holding periods of the Fund's securities. These rules, therefore, could affect the amount, timing and character of distributions to shareholders. Because these and other tax rules applicable to these types of transactions are in some cases uncertain under current law, an adverse determination or future guidance by the IRS with respect to these rules (which determination or guidance could be retroactive) may affect whether the Fund has made sufficient distributions, and otherwise satisfied the relevant requirements, to maintain its qualification as a regulated investment company and avoid the Fund-level tax.

Certain of the Fund's investments in derivative instruments and in foreign-currency denominated instruments, and any of the Fund's transactions in foreign currencies and hedging activities, are likely to produce a difference between the Fund's book income and the sum of its taxable income and net tax-exempt income (if any). If the Fund's book income is less than the sum of its taxable income and net tax-exempt income (if any), the Fund could be required to make distributions exceeding book income to qualify as a regulated investment company that is accorded special tax treatment and to avoid the Fund-level tax. If, in the alternative, the Fund's book income exceeds the sum of its taxable income (including realized capital gains) and net tax-exempt income (if any), the distribution (if any) of such excess will be treated as (i) a dividend to the extent of the Fund's remaining earnings and profits (including earnings and profits arising from tax-exempt income), (ii) thereafter, as a return of capital to the extent of the recipient's basis in its shares and (iii) thereafter, as gain from the sale or exchange of a capital asset.

Passive Foreign Investment Companies

A passive foreign investment company (a "PFIC") is any foreign corporation: (i) 75% or more of the gross income of which for the taxable year is passive income, or (ii) the average percentage of the assets of which (generally by value, but by adjusted tax basis in certain cases) that produce or are held for the production of passive income is at least 50%. Generally, passive income for this purpose means dividends, interest (including income equivalent to interest), royalties, rents, annuities, the excess of gains over losses from certain property transactions and commodities transactions and foreign currency gains. Passive income for this purpose does not include rents and royalties received by the foreign corporation from active business and certain income received from related persons.

Equity investments by the Fund in certain PFICs could potentially subject the Fund to a U.S. federal income tax or other charge (including interest charges) on the distributions received from the PFIC or on proceeds received from the disposition of shares in the PFIC. This tax cannot be eliminated by making distributions to Fund shareholders. However, the Fund may elect to avoid the imposition of that tax. For example, if the Fund is in a position to and elects to treat a PFIC as a "qualified electing fund" (*i.e.*, make a "QEF election"), the Fund will be required to include its share of the PFIC's income and net capital gains annually, regardless of whether it receives any distribution from the PFIC. Alternatively, the Fund may make an election to mark the gains (and to

a limited extent losses) in such holdings “to the market” as though it had sold and repurchased its holdings in those PFICs on the last day of the Fund’s taxable year. Such gains and losses are treated as ordinary income and loss. The QEF and mark-to-market elections may accelerate the recognition of income (without the receipt of cash) and increase the amount required to be distributed by the Fund to avoid taxation. Making either of these elections therefore may require the Fund to liquidate other investments (including when it is not advantageous to do so) to meet its distribution requirement, which also may accelerate the recognition of gain and affect the Fund’s total return. If the Fund indirectly invests in PFICs by virtue of the Fund’s investments in an Underlying RICs, such as an ETF, it may not make such PFIC elections; rather, the Underlying RICs directly investing in the PFICs would decide whether to make such elections. Dividends paid by PFICs will not be eligible to be treated as “qualified dividend income.” Because it is not always possible to identify a foreign corporation as a PFIC, the Fund may incur the tax and interest charges described above in some instances.

Original Issue Discount, Pay-in-Kind Securities, and Market Discount

Some debt obligations with a fixed maturity date of more than one year from the date of issuance (and all zero-coupon debt obligations with a fixed maturity date of more than one year from the date of issuance) will be treated as debt obligations that are issued originally at a discount. Generally, the amount of the original issue discount (“OID”) is treated as interest income and is included in the Fund’s taxable income (and required to be distributed by the Fund) over the term of the debt obligation, even though payment of that amount is not received until a later time (*i.e.*, upon partial or full repayment or disposition of the debt security) or is received in kind rather than in cash. Increases in the principal amount of an inflation-indexed bond will be treated as OID.

Some debt obligations with a fixed maturity date of more than one year from the date of issuance that are acquired by the Fund in the secondary market are treated as having “market discount.” Very generally, market discount is the excess of the stated redemption price of a debt obligation (or in the case of an obligation issued with OID, its “revised issue price”) over the purchase price of such obligation. In the case of higher-risk securities, the amount of market discount may be unclear. See “Higher-Risk Securities.” Subject to the discussion below regarding Section 451 of the Code, (i) generally, any gain recognized on the disposition of, and any partial payment of principal on, a debt obligation having market discount is treated as ordinary income to the extent the gain, or principal payment, does not exceed the “accrued market discount” on such debt obligation, (ii) alternatively, the Fund may elect to accrue market discount currently, in which case the Fund will be required to include the accrued market discount in the Fund’s income (as ordinary income) and thus distribute it over the term of the debt security, even though payment of that amount is not received until a later time, upon partial or full repayment or disposition of the debt security, and (iii) the rate at which the market discount accrues, and thus is included in the Fund’s income, will depend upon which of the permitted accrual methods the Fund elects. Notwithstanding the foregoing, effective for taxable years beginning after 2017, Section 451 of the Code generally requires any accrual method taxpayer to take into account items of gross income no later than the time at which such items are taken into account as revenue in the taxpayer’s financial statements. The IRS and the Department of the Treasury have issued final regulations providing that this rule does not apply to the accrual of market discount.

Some debt obligations with a fixed maturity date of one year or less from the date of issuance may be treated as having “acquisition discount” (very generally, the excess of the stated redemption price over the purchase price), or OID in the case of certain types of debt obligations. Generally, the Fund will be required to include the acquisition discount, or OID, in income (as ordinary income) over the term of the debt obligation, even though payment of that amount is not received until a later time, upon partial or full repayment or disposition of the debt security. The Fund may make one or more of the elections applicable to debt obligations having acquisition discount, or OID, which could affect the character and timing of recognition of income.

If the Fund holds the foregoing kinds of securities, it may be required to pay out as an income distribution each year an amount that is greater than the total amount of cash interest the Fund actually received. Such distributions may be made from the cash assets of the Fund or by liquidation of portfolio securities, if necessary (including

when it is not advantageous to do so). The Fund may realize gains or losses from such liquidations. In the event the Fund realizes net capital gains from such transactions, its shareholders may receive a larger capital gain distribution than they would in the absence of such transactions.

Securities Purchased at a Premium

Very generally, where the Fund purchases a bond at a price that exceeds the redemption price at maturity – that is, at a premium – the premium is amortizable over the remaining term of the bond. In the case of a taxable bond, if the Fund makes an election applicable to all such bonds it purchases, which election is irrevocable without consent of the IRS, the Fund reduces the current taxable income from the bond by the amortized premium and reduces its tax basis in the bond by the amount of such offset; upon the disposition or maturity of such bonds, the Fund is permitted to deduct any remaining premium allocable to a prior period.

Higher-Risk Securities

Investments in debt obligations that are at risk of or in default present special tax issues for the Fund. Tax rules are not entirely clear about issues such as when the Fund may cease to accrue interest, OID or market discount, when and to what extent deductions may be taken for bad debts or worthless securities and how payments received on obligations in default should be allocated between principal and income. In limited circumstances, it may also not be clear whether the Fund should recognize market discount on a debt obligation, and if so, what amount of market discount the Fund should recognize. These and other related issues will be addressed by the Fund when, as and if it invests in such securities, in order to seek to ensure that it distributes sufficient income to preserve its eligibility for treatment as a regulated investment company and does not become subject to U.S. federal income or excise tax.

Issuer Deductibility of Interest

A portion of the interest paid or accrued on certain high yield discount obligations owned by the Fund may not be deductible to (and thus, may affect the cash flow of) the issuer. If a portion of the interest paid or accrued on certain high yield discount obligations is not deductible, that portion will be treated as a dividend for purposes of the corporate dividends received deduction. In such cases, if the issuer of the high yield discount obligations is a domestic corporation, dividend payments by the Fund may be eligible for the dividends-received deduction to the extent of the deemed dividend portion of such accrued interest. Interest paid on debt obligations owned by the Fund, if any, that are considered for U.S. tax purposes to be payable in the equity of the issuer or a related party will not be deductible to the issuer, possibly affecting the cash flow of the issuer.

Tax-Exempt Shareholders

Income of a regulated investment company that would be UBTI if earned directly by a tax-exempt entity will not generally be attributed as UBTI to a tax-exempt shareholder of a regulated investment company. Notwithstanding this “blocking” effect, a tax-exempt shareholder could recognize UBTI by virtue of its investment in the Fund if shares in the Fund constitute debt-financed property in the hands of the tax-exempt shareholder within the meaning of Code Section 514(b).

Foreign Shareholders

In general, the Fund’s dividends are not subject to a U.S. withholding tax when paid to a shareholder that is not a “U.S. Person” within the meaning of the Code (such a shareholder, a “foreign shareholder”) to the extent properly reported by the Fund as (1) interest-related dividends or short-term capital gains dividends, each as defined below and subject to certain conditions described below, (2) Capital Gain Dividends or (3) distributions treated as a return of capital with respect to such foreign shareholder.

The exception to withholding for “interest-related dividends” generally applies with respect to distributions (other than distributions to a foreign shareholder (w) that does not provide a satisfactory statement that the beneficial owner is not a U.S. person, (x) to the extent that the dividend is attributable to certain interest on an obligation if the foreign shareholder is the issuer or is a 10% shareholder of the issuer, (y) that is within certain foreign countries that have inadequate information exchange with the United States or (z) to the extent the dividend is attributable to interest paid by a person that is a related person of the foreign shareholder and the foreign shareholder is a controlled foreign corporation) from U.S.-source interest income of types similar to those not subject to U.S. federal income tax if earned directly by an individual foreign shareholder, to the extent such distributions are properly reported as such by the Fund in a written notice to shareholders (“interest-related dividends”). The exception to withholding for “short-term capital gain dividends” generally applies with respect to distributions (other than (a) distributions to an individual foreign shareholder who is present in the United States for a period or periods aggregating 183 days or more during the year of the distribution or (b) distributions subject to special rules regarding the disposition of U.S. real property interests) of net short-term capital gains in excess of net long-term capital losses to the extent such distributions are properly reported by the Fund (“short-term capital gain dividends”). If the Fund invests in an Underlying RIC that pays such distributions to the Fund, such distributions retain their character as not subject to withholding if properly reported when paid by the Fund to foreign shareholders. The Fund is permitted to report such part of its dividends as interest-related or short-term capital gain dividends as are eligible, but is not required to do so. In the case of shares held through an intermediary, the intermediary may withhold even if the Fund reports all or a portion of a payment as an interest-related or short-term capital gain dividend to shareholders. These exemptions from withholding will not be available to foreign shareholders of the Fund if it does not currently report its dividends as interest-related or short-term capital gain dividends. Foreign shareholders should contact their intermediaries regarding the application of these rules to their accounts.

Distributions by the Fund to foreign shareholders other than Capital Gain Dividends, interest-related dividends and short-term capital gain dividends (e.g., distributions attributable to dividends and foreign-source interest income) are generally subject to withholding of U.S. federal income tax at a rate of 30% (or lower applicable treaty rate).

Under U.S. federal tax law, a foreign shareholder generally is not subject to U.S. federal income tax on gains (and is not allowed a deduction for losses) realized on the sale of shares of the Fund or on Capital Gain Dividends, interest-related dividends or short-term capital gain dividends unless (i) such gain or dividend is effectively connected with the conduct of a trade or business carried on by such holder within the United States, or (ii) in the case of an individual holder, the holder is present in the United States for a period or periods aggregating 183 days or more during the year of the sale or the receipt of the Capital Gain Dividend and certain other conditions are met. Foreign shareholders should consult their tax advisers and, if holding shares through intermediaries, their intermediaries, concerning the application of these rules to their investment in the Fund.

Foreign shareholders with respect to whom income from the Fund is effectively connected with a trade or business conducted by the foreign shareholder within the United States will in general be subject to U.S. federal income tax on the income derived from the Fund at the graduated rates applicable to U.S. citizens, residents or domestic corporations, whether such income is received in cash or reinvested in shares of the Fund and, in the case of a foreign corporation, may also be subject to a branch profits tax.

If a foreign shareholder is eligible for the benefits of a tax treaty, any effectively connected income or gain will generally be subject to U.S. federal income tax on a net basis only if it is also attributable to a permanent establishment maintained by the shareholder in the United States. More generally, foreign shareholders who are residents in a country with an income tax treaty with the United States may obtain different tax results than those described herein, and are urged to consult their tax advisers.

In order to qualify for any exemptions from withholding described above or for lower withholding tax rates under income tax treaties, or to establish an exemption from backup withholding, a foreign shareholder must comply

with special certification and filing requirements relating to its non-U.S. status (including, in general, furnishing an IRS Form W-8BEN or Form W-8BEN-E or substitute form). Foreign shareholders in the Fund should consult their tax advisers in this regard.

Special rules (including withholding and reporting requirements) apply to foreign partnerships and those holding Fund shares through foreign partnerships. Additional considerations may apply to foreign trusts and estates. Investors holding Fund shares through foreign entities should consult their tax advisers about their particular situation. A beneficial holder of shares who is a foreign shareholder may be subject to state and local tax and to the U.S. federal estate tax in addition to the federal tax on income referred to above.

Backup Withholding

The Fund generally is required to withhold and remit to the U.S. Treasury a percentage of the taxable distributions and redemption proceeds paid to any individual shareholder who fails to properly furnish the Fund with a correct taxpayer identification number, who has under-reported dividend or interest income, or who fails to certify to the Fund that he or she is not subject to such withholding.

Backup withholding is not an additional tax. Any amounts withheld may be credited against the shareholder's U.S. federal income tax liability, provided the appropriate information is furnished to the IRS.

Tax Basis Information

The Fund (or its administrative agent) must report to the IRS and furnish to Fund shareholders the cost basis information and holding period for Fund shares purchased on or after January 1, 2012. The Fund will permit Fund shareholders to elect from among several IRS-accepted cost basis methods, including average cost. In the absence of an election, shareholder cost basis will be determined under the default method selected by the Fund. The cost basis method a shareholder elects (or the cost basis method applied by default) may not be changed with respect to a redemption of shares after the settlement date of the redemption. Fund shareholders should consult with their tax advisers to determine the best IRS-accepted cost basis method for their tax situation and to obtain more information about how the new cost basis reporting rules apply to them.

Tax Shelter Reporting Regulations

Under U.S. Treasury regulations, if a shareholder recognizes a loss with respect to the Fund's shares of \$2 million or more for an individual shareholder or \$10 million or more for a corporate shareholder, the shareholder must file with the IRS a disclosure statement on Form 8886. Direct shareholders of portfolio securities are in many cases excepted from this reporting requirement, but under current guidance, shareholders of a regulated investment company are not excepted. Future guidance may extend the current exception from this reporting requirement to shareholders of most or all regulated investment companies. The fact that a loss is reportable under these regulations does not affect the legal determination of whether the taxpayer's treatment of the loss is proper. Shareholders should consult their tax advisers to determine the applicability of these regulations in light of their individual circumstances.

Shareholder Reporting Obligations with Respect to Foreign Bank and Financial Accounts

Shareholders that are U.S. persons and own, directly or indirectly, more than 50% of the Fund by vote or value could be required to report annually their "financial interest" in the Fund's "foreign financial accounts," if any, on FinCEN Form 114, Report of Foreign Bank and Financial Accounts. Shareholders should consult a tax adviser, and persons investing in the Fund through an intermediary should contact their intermediary, regarding the applicability to them of this reporting requirement.

Other Reporting and Withholding Requirements

Sections 1471-1474 of the Code and the U.S. Treasury Regulations and IRS guidance issued thereunder (collectively, “FATCA”) generally require the Fund to obtain information sufficient to identify the status of each of its shareholders under FATCA or under an applicable intergovernmental agreement (an “IGA”). If a shareholder fails to provide this information or otherwise fails to comply with FATCA or an IGA, the Fund or its agent may be required to withhold under FATCA 30% of the distributions, other than distributions properly reported as Capital Gain Dividends, the Fund pays to shareholders. If a payment by the Fund is subject to FATCA withholding, the Fund or its agent is required to withhold even if such payment would otherwise be exempt from withholding under the rules applicable to foreign shareholders described above. The IRS and the Department of Treasury have issued proposed regulations providing that the gross proceeds of share redemptions or exchanges and Capital Gain Dividends the Fund pays will not be subject to FATCA withholding.

Each prospective investor is urged to consult its tax adviser regarding the applicability of FATCA and any other reporting requirements with respect to the prospective investor’s own situation, including investments through an intermediary. In addition, foreign countries have implemented or are considering, and may implement, laws similar in purpose and scope to FATCA, as more fully described above.

Expenses Subject to Special Pass-Through Rules

The Fund will not be considered to be a “publicly offered” RIC if it does not have at least 500 investors at all times during a taxable year, is not regularly traded on an established securities market, and its shares are not treated as continuously offered pursuant to a public offering. It is possible that the Fund will not be treated as a “publicly offered” RIC for one or more of its taxable years. Very generally, pursuant to Treasury Department regulations, expenses of a RIC that is not “publicly offered,” except those specific to its status as a RIC or separate entity (e.g., registration fees or transfer agency fees), are subject to special “pass-through” rules. These expenses (which include direct and certain indirect advisory fees) are treated as additional dividends to certain Fund shareholders (generally including other RICs that are not “publicly offered,” individuals and entities that compute their taxable income in the same manner as an individual), and are, other than in the case of a shareholder that is a RIC that is not “publicly offered”, not deductible by those shareholders under current law.

Shares Purchased through Tax-Qualified Plans

Special tax rules apply to investments through defined contribution plans and other tax-qualified plans. Shareholders should consult their tax advisers to determine the suitability of shares of the Fund as an investment through such plans, and the precise effect of an investment on their particular tax situation.

Shareholders should consult their own tax advisers as to the state or local tax consequences of investing in the Fund.

PORTFOLIO TRANSACTIONS AND BROKERAGE

Investment Decisions and Portfolio Transactions

Investment decisions for the Fund are made with a view to achieving its investment objective. Investment decisions are the product of many factors in addition to basic suitability for the particular client involved (including the Fund). Some securities considered for investment by the Fund also may be appropriate for other accounts managed by the Adviser. Thus, a particular security may be bought or sold for certain accounts even though it could have been bought or sold for other accounts at the same time. If a purchase or sale of securities consistent with the investment policies of the Fund and one or more of these other accounts is considered at or about the same time, transactions in such securities will generally be allocated among the Fund and other accounts in the manner described above under “Potential Conflicts of Interest – Allocation of Investment Opportunities” and “– Conflicts of Interest Among Strategies” above. When the Adviser determines that an

investment opportunity is appropriate for the Fund and one or more other accounts, the Adviser will generally execute transactions for the Fund on an aggregated basis with the other accounts when the Adviser believes that to do so will allow it to obtain best execution and to negotiate more favorable commission rates or other transaction costs than might have otherwise been paid had such orders been placed independently. Aggregation, or “bunching,” describes a procedure whereby an investment adviser combines the orders of two or more clients into a single order for the purpose of obtaining better prices and lower execution costs.

Brokerage and Research Services

There is generally no stated commission in the case of securities traded on a principal basis in the over-the-counter markets, but the price paid by the Fund usually includes an undisclosed dealer commission or markup. In underwritten offerings, the price paid by the Fund includes a disclosed, fixed commission or discount retained by the underwriter or dealer. Transactions on U.S. stock exchanges and other agency transactions involve the payment by the Fund of negotiated brokerage commissions. Such commissions vary among different brokers. Also, a particular broker may charge different commissions according to such factors as the difficulty and size of the transaction. Transactions in non-U.S. securities generally involve the payment of fixed brokerage commissions, which are generally higher than those in the United States. The purchase by the Fund of participations or assignments may be pursuant to privately negotiated transactions pursuant to which the Fund may be required to pay fees to the seller or forego a portion of payments in respect of the participation agreement.

The Adviser places orders for the purchase and sale of portfolio securities, options and futures contracts and buys and sells such securities, options and futures for the Fund through multiple brokers and dealers. The Adviser will place trades for execution only with approved brokers or dealers. In effecting such purchases and sales, the Adviser seeks the most favorable price and execution of the Fund’s orders. In doing so, the Fund may pay higher commissions than the lowest available when the Adviser believes it is reasonable to do so. In seeking the most favorable price and execution, the Adviser, having in mind the Fund’s best interests, considers all factors it deems relevant, including, price, the size of the transaction, the nature of the market for the security, the amount of the commission, the timing of the transaction taking into account market prices and trends, the reputation, experience and financial stability of the broker-dealer involved and the quality of service rendered by the broker-dealer in that or other transactions.

It has for many years been a common practice in the investment advisory business for advisers of investment companies and other institutional investors to receive research and brokerage products and services (together, “research and brokerage services”) from broker-dealers which execute portfolio transactions for the clients of such advisers. Consistent with this practice, the Adviser may receive research and brokerage services from broker-dealers with which the Adviser places the Fund’s portfolio transactions. These research and brokerage services, which in some cases also may be purchased for cash, may include, among other things, such items as general economic and security market reviews, industry and company reviews, evaluations of securities, recommendations as to the purchase and sale of securities and services related to the execution of securities transactions. The advisory fees paid by the Fund are not reduced because the Adviser receives such research and brokerage services even though the receipt of such research and brokerage services relieves the Adviser from expenses it might otherwise bear. Research and brokerage services provided by broker-dealers chosen by the Adviser to place the Fund’s transactions may be useful to the Adviser in providing services to the Adviser’s other clients, although not all of these research and brokerage services may be necessarily useful and of value to the Adviser in managing the Fund. Conversely, research and brokerage services provided to the Adviser by broker-dealers in connection with trades executed on behalf of other clients of the Adviser may be useful to the Adviser in managing the Fund, although not all of these research and brokerage services may be necessarily useful and of value to the Adviser in managing such other clients. To the extent the Adviser uses such research and brokerage services, it will use them for the benefit of all clients, to the extent reasonably practicable. Currently, the Adviser does not direct portfolio transactions for the Fund to a particular broker-dealer because the broker dealer provides soft dollar benefits to the Adviser.

In reliance on the “safe harbor” provided by Section 28(e) of the Exchange Act, the Adviser may cause the Fund to pay a broker-dealer which provides “brokerage and research services” (as defined for purposes of Section 28(e)) to the Adviser an amount of commission for effecting a securities transaction for the Fund in excess of the commission which another broker-dealer would have charged for effecting that transaction if the Adviser makes a good faith determination that the commissions are reasonable in relation to the value of brokerage and research services provided, viewed in terms of either a particular transaction or the Adviser’s overall responsibilities to all discretionary accounts.

The Adviser may place orders for the purchase and sale of exchange-listed portfolio securities with a broker-dealer that is an affiliate of the Adviser where, in the judgment of the Adviser, such firm will be able to obtain a price and execution at least as favorable as other qualified broker-dealers. Pursuant to rules of the Commission, a broker-dealer that is an affiliate of the Adviser may receive and retain compensation for effecting portfolio transactions for the Fund on a securities exchange if the commissions paid to such an affiliated broker-dealer by the Fund on exchange transactions do not exceed “usual and customary brokerage commissions.” The rules define “usual and customary” commissions to include amounts which are “reasonable and fair compared to the commission, fee or other remuneration received or to be received by other brokers in connection with comparable transactions involving similar securities being purchased or sold on a securities exchange during a comparable period of time.”

The Fund paid the following brokerage commissions during the most recent three fiscal years ended October 31.

<u>Fiscal Year Ended October 31, 2018</u>	<u>Fiscal Year Ended October 31, 2019</u>	<u>Fiscal Year Ended October 31, 2020</u>
\$10,298	\$3,598	\$47,210

Regular Broker Dealers. The Fund is required to identify the securities of its regular brokers or dealers (as defined in Rule 10b-1 under the 1940 Act) or their parent companies held by the Fund as of the close of its most recent fiscal year and state the value of such holdings. The Fund did not acquire securities of its regular brokers or dealers or of their parents during the fiscal year ended October 31, 2020.

DESCRIPTION OF THE TRUST

The Trustees are responsible for the management and supervision of the Trust. The Trust’s Declaration of Trust permits the Trustees to issue an unlimited number of full and fractional shares of beneficial interest of the Fund or other series of the Trust with or without par value. Under the Declaration of Trust, the Trustees have the authority to create and classify shares of beneficial interest in separate series and classes without further action by shareholders. Additional series may be added in the future. The Trustees also have authorized the issuance of two classes of shares for the Fund, designated as Class I and Class M. Additional classes of shares may be authorized in the future.

The shares of each class of the Fund represent an equal proportionate interest in the net assets attributable to that class of the Fund. Holders of each class of shares have certain exclusive voting rights on matters relating to their respective distribution plan, if any. The different classes of the Fund may bear different expenses relating to the cost of holding shareholder meetings necessitated by the exclusive voting rights of any class of shares.

Dividends paid by the Fund, if any, with respect to each class of shares will be calculated in the same manner, at the same time and on the same day and will be in the same amount, except for differences resulting from the facts that: (i) the distribution and service fees, if any, relating to each class will be borne exclusively by that class; and (ii) each class of shares will bear any class expenses properly allocable to that class of shares, subject to the conditions the IRS imposes with respect to the multiple- class structures. Similarly, the NAV per share may vary depending on which class of shares is purchased. No interest will be paid on uncashed dividend or redemption checks.

Unless otherwise required by the 1940 Act or the Declaration of Trust, the Trust has no intention of holding annual meetings of shareholders. Trust shareholders may remove a Trustee by the affirmative vote of at least two-thirds of the Trust's outstanding shares and the Trustees shall promptly call a meeting for such purpose when requested to do so in writing by the record holders of a majority of the outstanding shares of the Trust. Shareholders may, under certain circumstances, communicate with other shareholders in connection with requesting a special meeting of shareholders. However, at any time that less than a majority of the Trustees holding office were elected by the shareholders, the Trustees will call a special meeting of shareholders for the purpose of electing Trustees.

In the event of liquidation, shareholders of each Class are entitled to share pro rata in the net assets of the Fund available for distribution to these shareholders. Shares entitle their holders to one vote per share (and fractional votes for fractional shares), are freely transferable and have no preemptive, subscription or conversion rights. When issued, shares are fully paid and non-assessable.

The Declaration of Trust disclaims shareholder liability for acts or obligations of the Trust. The Declaration of Trust further provides for indemnification out of the Fund's property for all loss and expense of any shareholder held personally liable for the obligations of the Fund by reason of owning shares of the Fund. Thus, the risk of a shareholder incurring financial loss on account of shareholder liability is considered remote since it is limited to circumstances in which the disclaimer is inoperative and the Fund itself would be unable to meet its obligations.

The Declaration of Trust further provides that the Board will not be liable for errors of judgment or mistakes of fact or law. However, nothing in the Declaration of Trust protects a Trustee against any liability to which the Trustee would otherwise be subject by reason of willful misfeasance, bad faith, gross negligence or reckless disregard of the duties involved in the conduct of his or her office. The Declaration of Trust of the Trust provides for indemnification by the Trust of Trustees and officers of the Trust; however, such persons may not be indemnified against any liability to the Trust or the Trust's shareholders to whom he or she would otherwise be subject by reason of willful misfeasance, bad faith, gross negligence or reckless disregard of the duties involved in the conduct of his or her office.

PURCHASES AND REDEMPTION OF SHARES

The Fund reserves the right to reject any purchase order application that conflicts with the Fund's internal policies or the policies of any regulatory authority. All checks must be in U.S. Dollars drawn on a domestic bank (*i.e.*, a bank with a branch in the U.S.). The Fund will not accept payment in cash or money orders. The Fund does not accept postdated checks or any conditional order or payment. To prevent check fraud, the Fund will not accept third-party checks, Treasury checks, credit card checks, traveler's checks or starter checks for the purchase of shares.

If you elect to receive distributions and/or dividends by check and the post office cannot deliver the check, or if the check remains uncashed for six months, the Fund reserves the right to reinvest the distribution check in your Fund account at the then current NAV per share and to reinvest all subsequent distributions in shares of the Fund.

Information provided on the account application may be used by the Fund to verify the accuracy of the information or for background or financial history purposes. A joint account will be administered as a joint tenancy with right of survivorship, unless the joint owners notify the transfer agent of a different intent. A shareholder's account is governed by the laws of the State of Delaware. For telephone transactions, the Transfer Agent will take measures to verify the identity of the caller, such as asking for name, account number, Social Security or other taxpayer ID number and other relevant information. If appropriate measures are taken, the Transfer Agent is not responsible for any loss that may occur to any account due to an unauthorized telephone call. Also for your protection telephone redemptions are not permitted on accounts whose names or addresses have changed within the past 30 days. Proceeds from telephone transactions can only be mailed to the address of record or sent via wire or ACH to the bank of record pre-established on the account.

FINANCIAL STATEMENTS

The audited financial statements and notes thereto in the Fund's Annual Report to Shareholders for the fiscal year ended on October 31, 2020, as filed with the Commission on January 11, 2021 (Accession No. 0001193125-21-006407) (the "Annual Report"), are incorporated into this SAI by reference. The financial statements included in the Annual Report have been audited by Ernst & Young LLP, whose report thereon is also incorporated herein by reference. No other parts of the Annual Report are incorporated by reference herein. Copies of the Annual Report may be obtained at no charge by calling the Fund at (855) 609-3680.

APPENDIX A

SECURITIES RATINGS

The rating of a rating service represents the service's opinion as to the credit quality of the security being rated. However, the ratings are general and are not absolute standards of quality or guarantees as to the creditworthiness of an issuer. Consequently, the Adviser believes that the quality of debt securities in which the Fund invests should be continuously reviewed. A rating is not a recommendation to purchase, sell or hold a security, because it does not take into account market value or suitability for a particular investor. When a security has received a rating from more than one service, each rating should be evaluated independently. Ratings are based on current information furnished by the issuer or obtained by the ratings services from other sources, which they consider reliable. Ratings may be changed, suspended or withdrawn as a result of changes in or unavailability of such information or for other reasons.

The following is a description of the characteristics of ratings used by Moody's and S&P Global Ratings.

Moody's Ratings*

Aaa—Obligations rated Aaa are judged to be of the highest quality, subject to the lowest level of credit risk.

Aa—Obligations rated Aa are judged to be of high quality and are subject to very low credit risk.

A—Obligations rated A are judged to be upper-medium-grade and are subject to low credit risk.

Baa—Obligations rated Baa are judged to be medium-grade and subject to moderate credit risk and as such may possess certain speculative characteristics.

Ba—Obligations rated Ba are judged to be speculative and are subject to substantial credit risk.

B—Obligations rated B are considered speculative and are subject to high credit risk.

Caa—Obligations rated Caa are judged to be speculative of poor standing and are subject to very high credit risk.

Ca—Obligations rated Ca are highly speculative and are likely in, or very near, default, with some prospect of recovery of principal and interest.

C—Obligations rated C are the lowest rated and are typically in default, with little prospect for recovery of principal or interest.

*Note: Moody's appends numerical modifiers 1, 2 and 3 to each generic rating classification from Aa through Caa. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

S&P Global Ratings*

AAA—An obligation rated 'AAA' has the highest rating assigned by S&P Global Ratings. The obligor's capacity to meet its financial commitments on the obligation is extremely strong.

AA—An obligation rated 'AA' differs from the highest-rated obligations only to a small degree. The obligor's capacity to meet its financial commitments on the obligation is very strong.

A—An obligation rated 'A' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories. However, the obligor's capacity to meet its financial commitments on the obligation is still strong.

BBB—An obligation rated ‘BBB’ exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to weaken the obligor’s capacity to meet its financial commitments on the obligation.

BB; B; CCC; CC; and C—Obligations rated ‘BB’, ‘B’, ‘CCC’, ‘CC’ and ‘C’ are regarded as having significant speculative characteristics. ‘BB’ indicates the least degree of speculation and ‘C’ the highest. While such obligations will likely have some quality and protective characteristics, these may be outweighed by large uncertainties or major exposures to adverse conditions.

BB—An obligation rated ‘BB’ is less vulnerable to nonpayment than other speculative issues. However, it faces major ongoing uncertainties or exposure to adverse business, financial or economic conditions that could lead to the obligor’s inadequate capacity to meet its financial commitments on the obligation.

B—An obligation rated ‘B’ is more vulnerable to nonpayment than obligations rated ‘BB’, but the obligor currently has the capacity to meet its financial commitments on the obligation. Adverse business, financial or economic conditions will likely impair the obligor’s capacity or willingness to meet its financial commitments on the obligation.

CCC—An obligation rated ‘CCC’ is currently vulnerable to nonpayment and is dependent upon favorable business, financial and economic conditions for the obligor to meet its financial commitments on the obligation. In the event of adverse business, financial or economic conditions, the obligor is not likely to have the capacity to meet its financial commitments on the obligation.

CC—An obligation rated ‘CC’ is currently highly vulnerable to nonpayment. The ‘CC’ rating is used when a default has not yet occurred but S&P Global Ratings expects default to be a virtual certainty, regardless of the anticipated time to default.

C—An obligation rated ‘C’ is currently highly vulnerable to nonpayment, and the obligation is expected to have lower relative seniority or lower ultimate recovery compared with obligations that are rated higher.

D—An obligation rated ‘D’ is in default or in breach of an imputed promise. For non-hybrid capital instruments, the ‘D’ rating category is used when payments on an obligation are not made on the date due, unless S&P Global Ratings believes that such payments will be made within five business days in the absence of a stated grace period or within the earlier of the stated grace period or 30 calendar days. The ‘D’ rating also will be used upon the filing of a bankruptcy petition or the taking of similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions. A rating on an obligation is lowered to ‘D’ if it is subject to a distressed debt restructuring.

NR—This indicates that a rating has not been assigned or is no longer assigned.

*The ratings from ‘AA’ to ‘CCC’ may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the rating categories.

APPENDIX B

STONE RIDGE ASSET MANAGEMENT LLC PROXY VOTING POLICIES AND PROCEDURES

I. Governing Standards

The Registered Funds have delegated to the Adviser the responsibility for voting Registered Fund securities. Private Funds or Managed Account Clients may delegate such responsibility to the Adviser.¹ As a fiduciary, an investment adviser with proxy voting authority has a duty to monitor corporate events and to vote proxies, as well as a duty to cast votes in the best interest of clients and not subrogate client interests to its own interests. The Adviser has adopted these written proxy voting policies and procedures (the “Proxy Policy”) as required under Rule 206(4)-6 under the Advisers Act. In addition to covering the voting of equity securities, the Proxy Policy also applies generally to voting and/or consent rights of fixed income securities, including but not limited to, plans of reorganization, and waivers and consents under applicable indentures. The Proxy Policy does not apply, however, to consent rights that primarily entail decisions to buy or sell investments, such as tender or exchange offers, conversions, put options, redemption and Dutch auctions. The Proxy Policy, which has been designed to ensure that the Adviser votes proxies in the best interest of its Clients and provides Clients with information about how their proxies are voted, contains procedures to mitigate material conflicts of interests between Clients and the Adviser and its affiliated persons when voting proxies.

For the avoidance of doubt, the Proxy Policy applies to shareholder votes and consents that the Adviser has authority to exercise on behalf of a Client, including votes and consents for private entities that do not involve proxies. All references to votes by proxy in this Proxy Policy shall be interpreted to include both votes by proxy and votes and consents that do not involve proxies.

II. Policy

The Proxy Policy applies to those Client accounts that contain voting securities and for which the Adviser has been delegated the authority to vote client proxies. When voting proxies for Client accounts, the Adviser’s primary objective is to make voting decisions solely in the best interest of all Clients for which it manages assets. The Adviser has selected an unaffiliated third party proxy research and voting service, Institutional Shareholder Services Inc. (“ISS” or the “Proxy Voting Service”), to assist it in researching, recordkeeping and voting of proxies. With respect to each proxy received, the Proxy Voting Service researches the financial implications of the proposals and provides a recommendation to the Adviser as to how to vote on each proposal based on the Proxy Voting Service’s research of the individual facts and circumstances and the Proxy Voting Service’s application of its research findings to an applicable set of guidelines, the ISS’ Proxy Voting Summary Guidelines (“ISS Guidelines”). The ISS Guidelines are intended to provide a general overview by highlighting the key policies that ISS applies to companies listed in the applicable geographic region. However, ISS’ analysis is on a case-by-case basis, taking into consideration sector, industry and business performance factors. These guidelines have been approved by the Adviser and, although the Adviser intends to vote consistently with the voting recommendation of the Proxy Voting Service, upon the recommendation of the applicable portfolio managers, the Adviser may determine to override any recommendation made by the Proxy Voting Service or abstain from voting. In the event that the Proxy Voting Service does not provide a recommendation with respect to a proposal, as in the case of votes involving private issuers, the Adviser may determine to vote on the proposals directly and will do so in a manner consistent with the principles set forth in this Proxy Policy.

The Adviser may determine not to vote a proxy if: (1) the effect on the applicable economic interests or the value of the portfolio holding is insignificant in relation to an individual Client account or in the aggregate with all Client accounts; (2) the cost of voting the proxy outweighs the possible benefit to the applicable Client

¹ The specific obligations that the Adviser bears depend upon the scope of voting authority assumed by the Adviser.

account, including situations where a jurisdiction imposes share blocking restrictions that may affect the ability of the portfolio managers to effect trades in the related security; or (3) the Adviser otherwise has determined that it is consistent with its fiduciary obligations not to vote the proxy.

In addition, neither the Adviser nor the Proxy Voting Service will be able to vote for any securities on loan by an account. In the event that the Adviser is aware of a material vote on behalf of a Client with respect to securities on loan by the custodian, the Adviser will call back the loan to vote the proxy if the Adviser determines that the benefits to the Client of voting on such proposal outweigh the benefits to the client of having the security remain out on loan, and if time permits.

The Adviser will not accept direction on how to vote individual proxies for which it has voting responsibility from any other person or organization other than Adviser personnel or the Proxy Voting Service.

III. Conflicts of Interest Procedures

For voting of securities, the Adviser believes that application of the ISS Guidelines to vote proxies should, in most cases, adequately address any possible conflicts of interest, as the ISS Guidelines are predetermined. As a general practice, the Adviser will vote in accordance with the voting recommendation provided by ISS. In the event that the Adviser wishes to vote against the independent voting recommendation, the Adviser requires CCO approval prior to a vote being cast.

Upon the identification or notice received by the CCO that there is a potential conflict of interest with respect to casting a vote, the CCO will discuss the proxy with the relevant portfolio manager(s) and other senior management in order to determine if the potential conflict is material. In instances where a portfolio manager proposes to vote a proxy inconsistent with the ISS Guidelines and a potential immaterial conflict is identified, the CCO will review the proxy votes in order to determine whether a portfolio manager's voting rationale appears reasonable. Upon the detection of a material potential conflict of interest, the CCO has final decision-making authority regarding the Adviser's course of action for the proxy. The CCO will seek to cause the proxy to be voted in a manner consistent with the Client's best interests.

IV. Review

The Adviser will supervise and, no less frequently than annually, review its proxy voting activities and the implementation of the Proxy Voting Policy.

V. Proxy Voting Policies and Procedures Specific to Registered Funds

The Registered Funds will disclose in their SAIs and for closed-end funds, in item 7 of the Form N-CSR, a description of their policies and procedures used to determine how to vote proxies relating to portfolio securities, including the procedures used when a vote presents a conflict between the interests of Registered Fund shareholders, on the one hand, and those of the Registered Fund's investment adviser; principal underwriter; or any affiliated person of the Fund, its investment adviser, or its principal underwriter, on the other.

The Registered Funds are also required to include in their SAIs any policies and procedures of the Adviser or any other third party that the Registered Funds use, or that are used on the Registered Funds' behalf, to determine how to vote proxies relating to portfolio securities.

Rule 30b1-4 under the 1940 Act requires mutual funds to file with the SEC an annual record of proxies voted by a fund on Form N-PX. Form N-PX must be filed each year no later than August 31 and must contain each Registered Fund's proxy voting record for the most recent twelve-month period ending June 30.

The Registered Funds must also state in their disclosure documents (in their SAIs and shareholder reports) that information regarding how the Registered Fund voted proxies relating to portfolio securities during the most recent 12-month period ended June 30 is available (1) without charge, upon request, by calling a specified toll-free (or collect) telephone number; or on or through the Registered Fund's website at a specified Internet address; or both; and (2) on the SEC's website at <http://www.sec.gov>.

If a Registered Fund discloses that its proxy voting record is available by calling a toll-free (or collect) telephone number, and the Registered Fund (or financial intermediary through which shares of the Registered Fund may be purchased or sold) receives a request for this information, the Registered Fund (or financial intermediary) must send the information disclosed in the Registered Fund's most recently filed report on Form N-PX within three business days of receipt of the request, by first-class mail or other means designed to ensure equally prompt delivery.

If a Registered Fund discloses that its proxy voting record is available on or through its website, the Registered Fund must make available free of charge the information disclosed in the Registered Fund's most recently filed report on Form N-PX on or through its website as soon as reasonably practicable after filing the report with the SEC. The information disclosed in the Fund's most recently filed report on Form N-PX must remain available on or through the Registered Fund's website for as long as the Registered Fund remains subject to the requirements of Rule 30b1-4 and discloses that the Registered Fund's proxy voting record is available on or through its website.

It is the responsibility of Legal and Compliance to ensure that the Registered Funds satisfy the disclosure requirements.
